THE LOUIS BERGER, GROUP, INC. GRADUATE INTERNSHIP AND FELLOWSHIP PROGRAM AT NJIT

The Louis Berger Group, Inc. funds a graduate internship and fellowship program to support NJIT students pursuing a Master’s degree in Civil Engineering, Environmental Engineering, Architecture, Engineering Management, Mechanical Engineering or Industrial Engineering. The program allows students to be considered for a fellowship award while also taking on a professional summer paid internship overseas with one of the world’s leading consulting organizations.

This program gives graduate students the opportunity to receive tuition funding while pursuing a Master’s degree at NJIT as well as to conduct professional work as summer interns with the Louis Berger Group under the direction of the organization’s senior management in one of its international offices. Graduate students may apply after successfully completing one semester in a Master’s program at NJIT.

You are cordially invited to an inaugural event organized by the Graduate Studies Office and Career Development Services. The first two recipients of this award will make a presentation about their internship experience in Doha, Qatar where they worked on a subway station project in preparation for the 2022 FIFA World Cup.

Louis Berger Group representatives will be present to answer questions about their national and international activities.

Event details: Tuesday, November 3, 2015
4:30 PM-6:00 PM
Campus Center Atrium (corner of Summit and Bleeker Street), NJIT, Newark, NJ 07102
Refreshments will be served

Louis Berger Group, Inc. serves clients nationally and internationally to address development, community revitalization and infrastructure management. Areas of focus include environmental services, construction, transit, highways and bridges, aviation and energy, as well as planning, policy and management activities.
