

NJIT Center for Pre-College Programs

Student and Family Virtual Campus Tour

featuring NJIT campus locations used for pre-college programs

Our campus is easily accessible and compact enough to get around quickly.

Even though University Heights is a historic area, most of our buildings are modern on the outside and all are modern on the inside with up-to-date labs and other facilities.

Many of the facilities are available even to our youngest students.

Modern parking decks, such as the one in the bottom left corner on this map, eliminate the need to search for a space.

For most summer programs, if you bring your child to campus or if a school bus from your district drops them off, this is where they'll start out. This is one of the residential parts of the campus with the Albert Dorman Honors College Dorm on the left. Albert Dorman is one of 6 colleges comprising the university. Program staff walk students down Warren Street one block to cross at Summit Street.

Entering campus from Warren Street, you'll pass the campus bookstore, the Hillier College of Architecture and Design, the Microfabrication Innovation Center, and the first two academic buildings built for NJIT – one of which, Campbell Hall, the red brick one on the right, houses our offices.

The next building is one of the prettiest on campus. NJIT completely reimaged and repurposed the former Newark Central High School to LEED Gold standard. Now named the Central King Building, it houses several departments in two of our Colleges: Engineering and Science and Liberal Arts. It is where a number of our pre-college programs' classes are located, both during the academic year and in the summer.

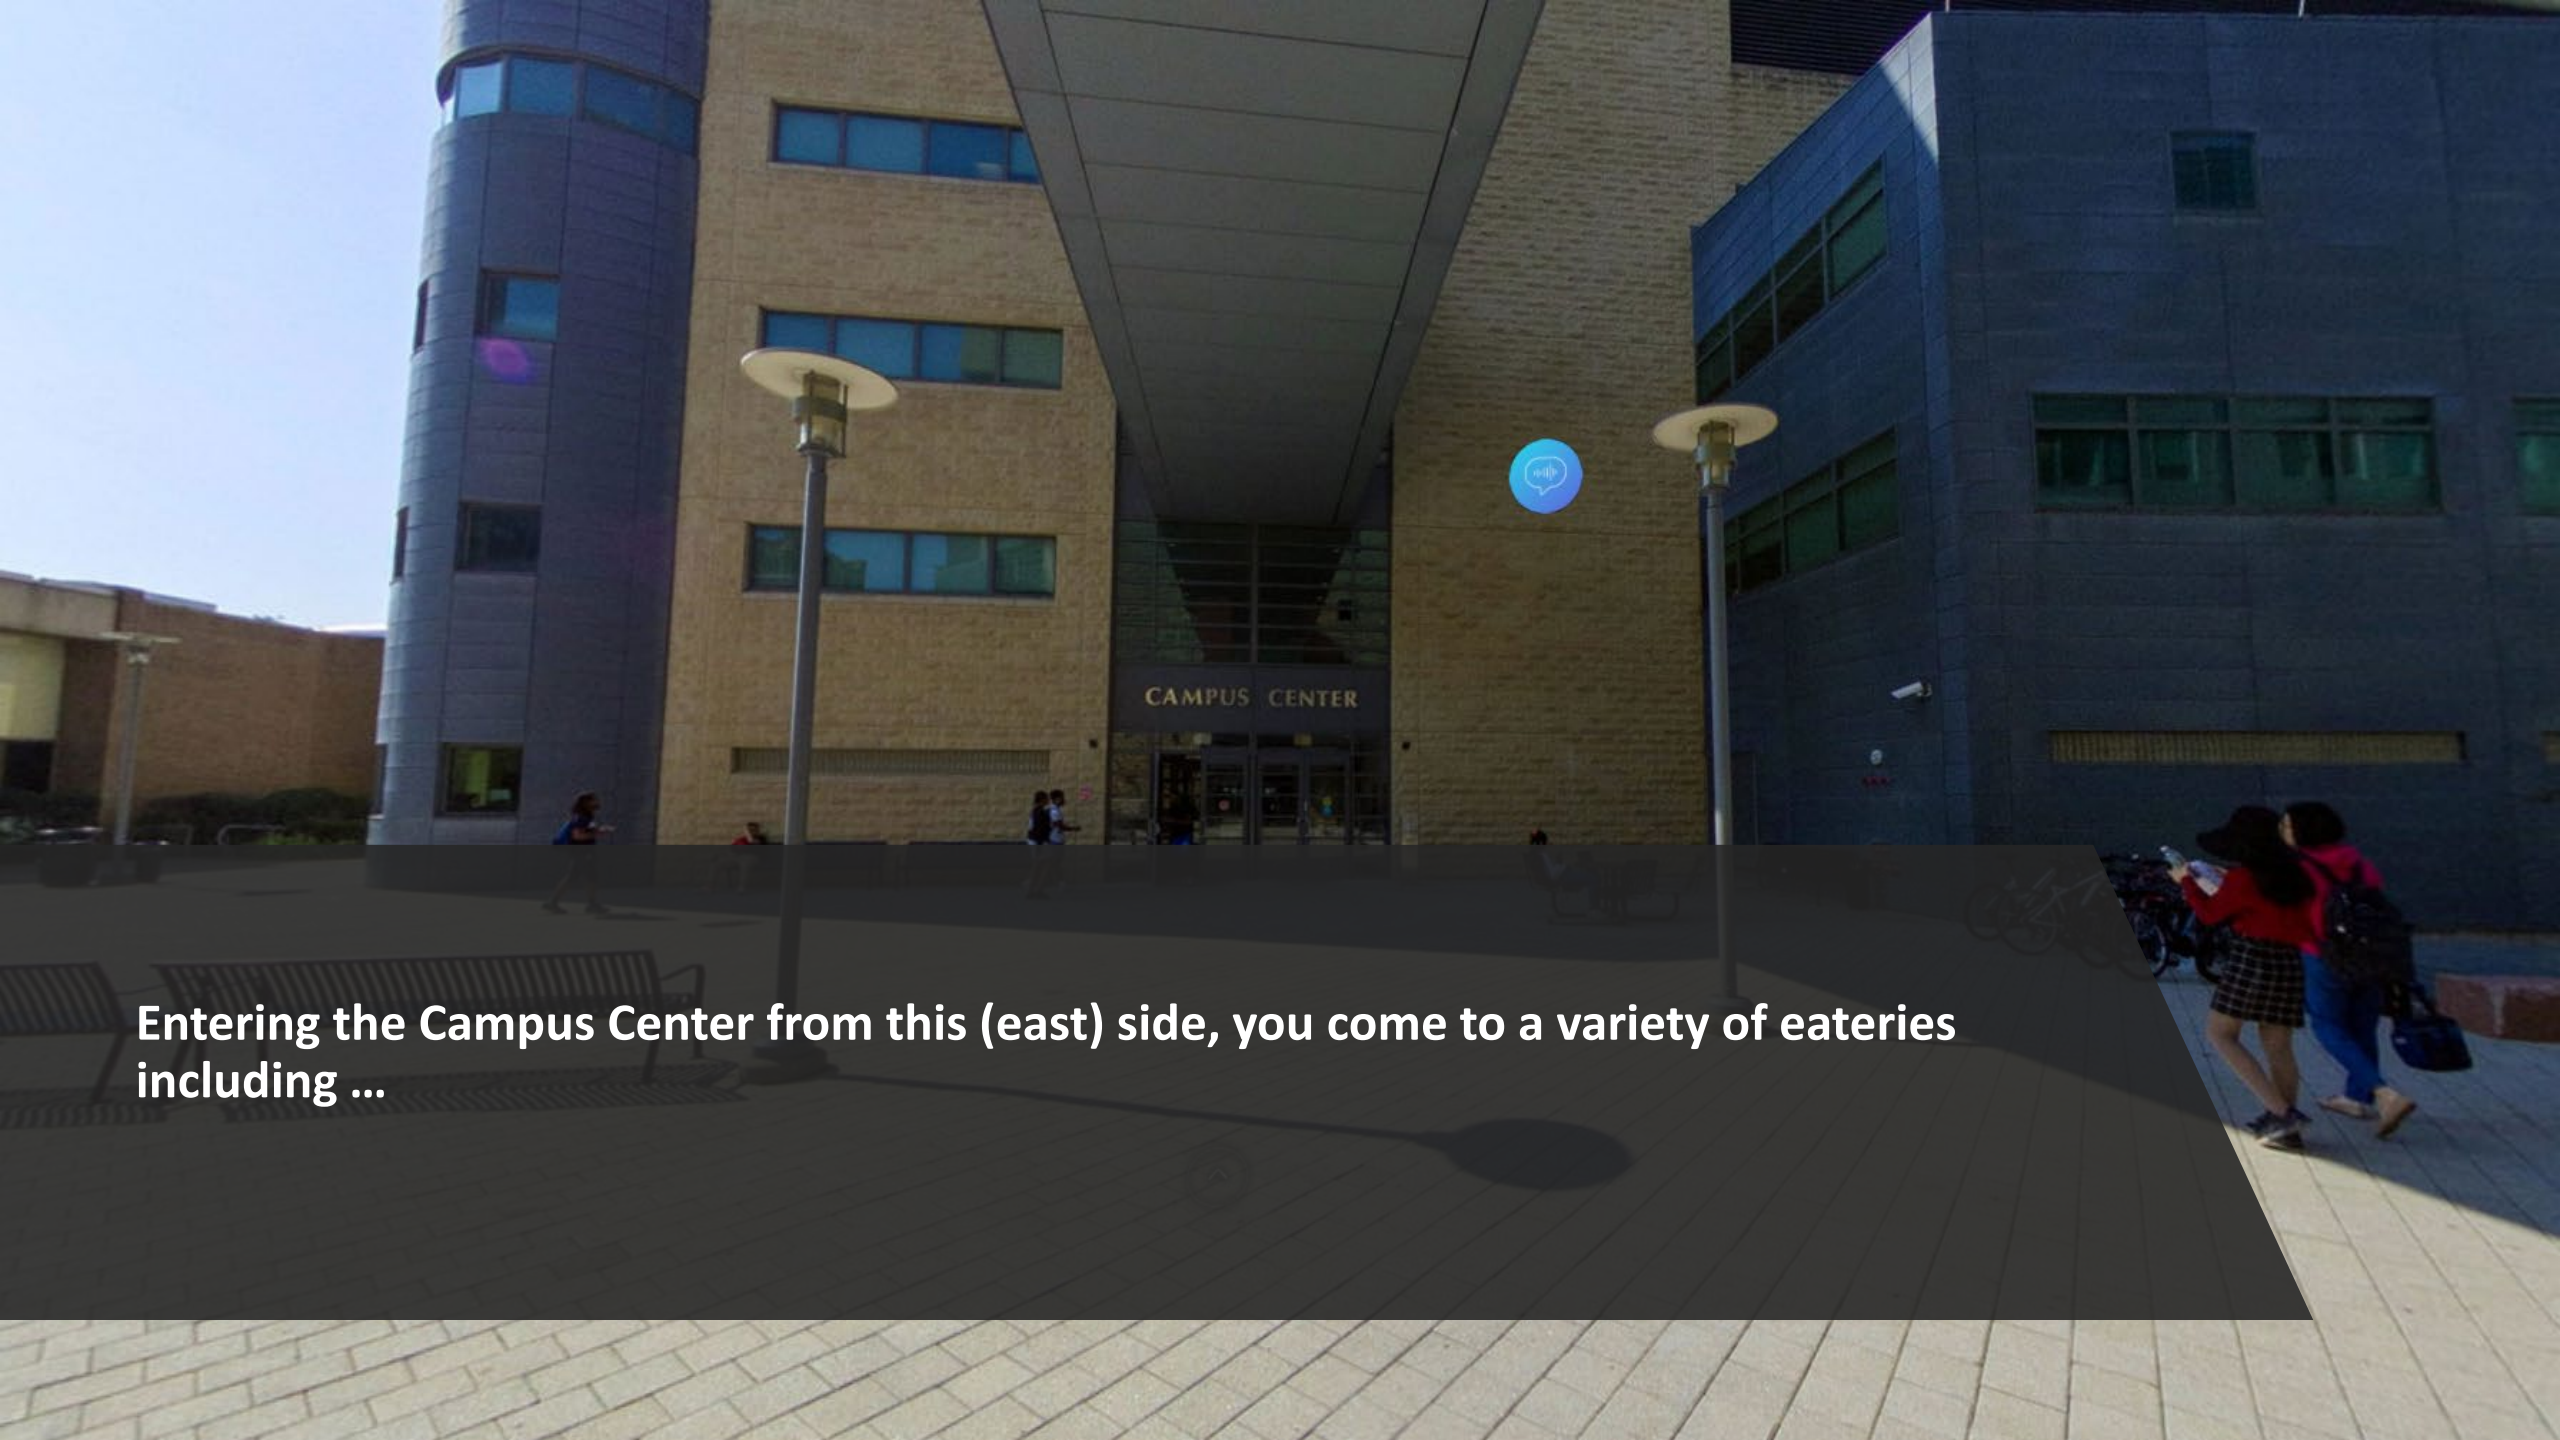

Across (west) from Central King are several science and engineering buildings on the left and our theater on the right, all of which house classes in our academic year and summer programs.

The top photo shows a learning commons in Central King.

From this view, the main entrance of Central King, you'll see our administration building on the right. The theater building is on the left with the Campus Center, our next stop, beyond the tree.

The grey and red pedestrian bridge connects the administration building and the Campus Center.

Entering the Campus Center from this (east) side, you come to a variety of eateries including ...

... our cafeteria commons where students in many of our programs eat lunch.

GAME ROOM RULES

1. No Food or Drinks Allowed in Game Room
2. No Smoking Allowed in Game Room or Bowling Area
3. No Sitting on Pool Tables
4. No Jump Shots
5. No Profanity
6. No Pets in Game Room or Bowling Area
7. No Gum Allowed in Game Room or Bowling Area
8. Do NOT walk out on lanes.
9. No Running in Game Room
10. No Gambling
11. No Disorderly Conduct

We intentionally build recreation into our summer programs. Some of the recreation is housed in the Campus Center including the bowling alley and game room on the lower level.

Exiting the Campus Center from the other (west) side brings you to our patio and green. The sand-colored building in the background is part of the Guttenberg Information Sciences complex which also houses the NJIT Makerspace, one of the three best-equipped and most comprehensive university makerspaces in the U.S.

Incidentally, you may notice sculptures around campus representing some devices invented at NJIT, such as the television shown here.

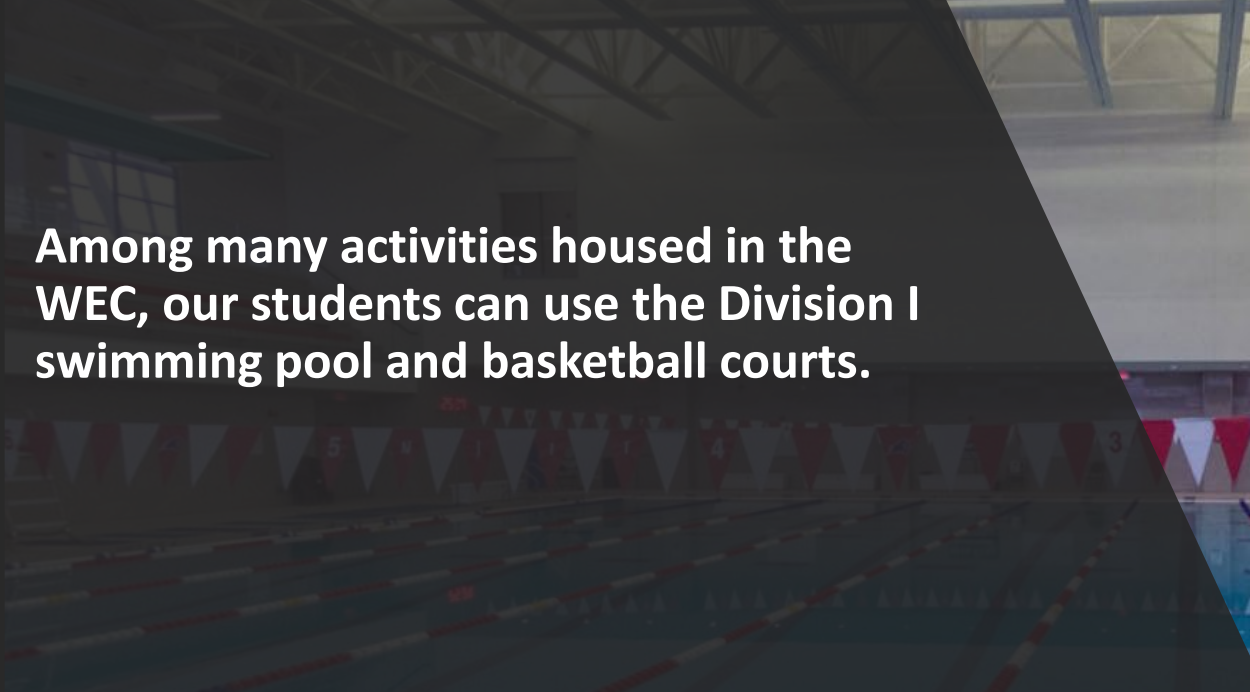

Some of our programs are housed in the Makerspace and a number of our students are able to have maker experiences here.

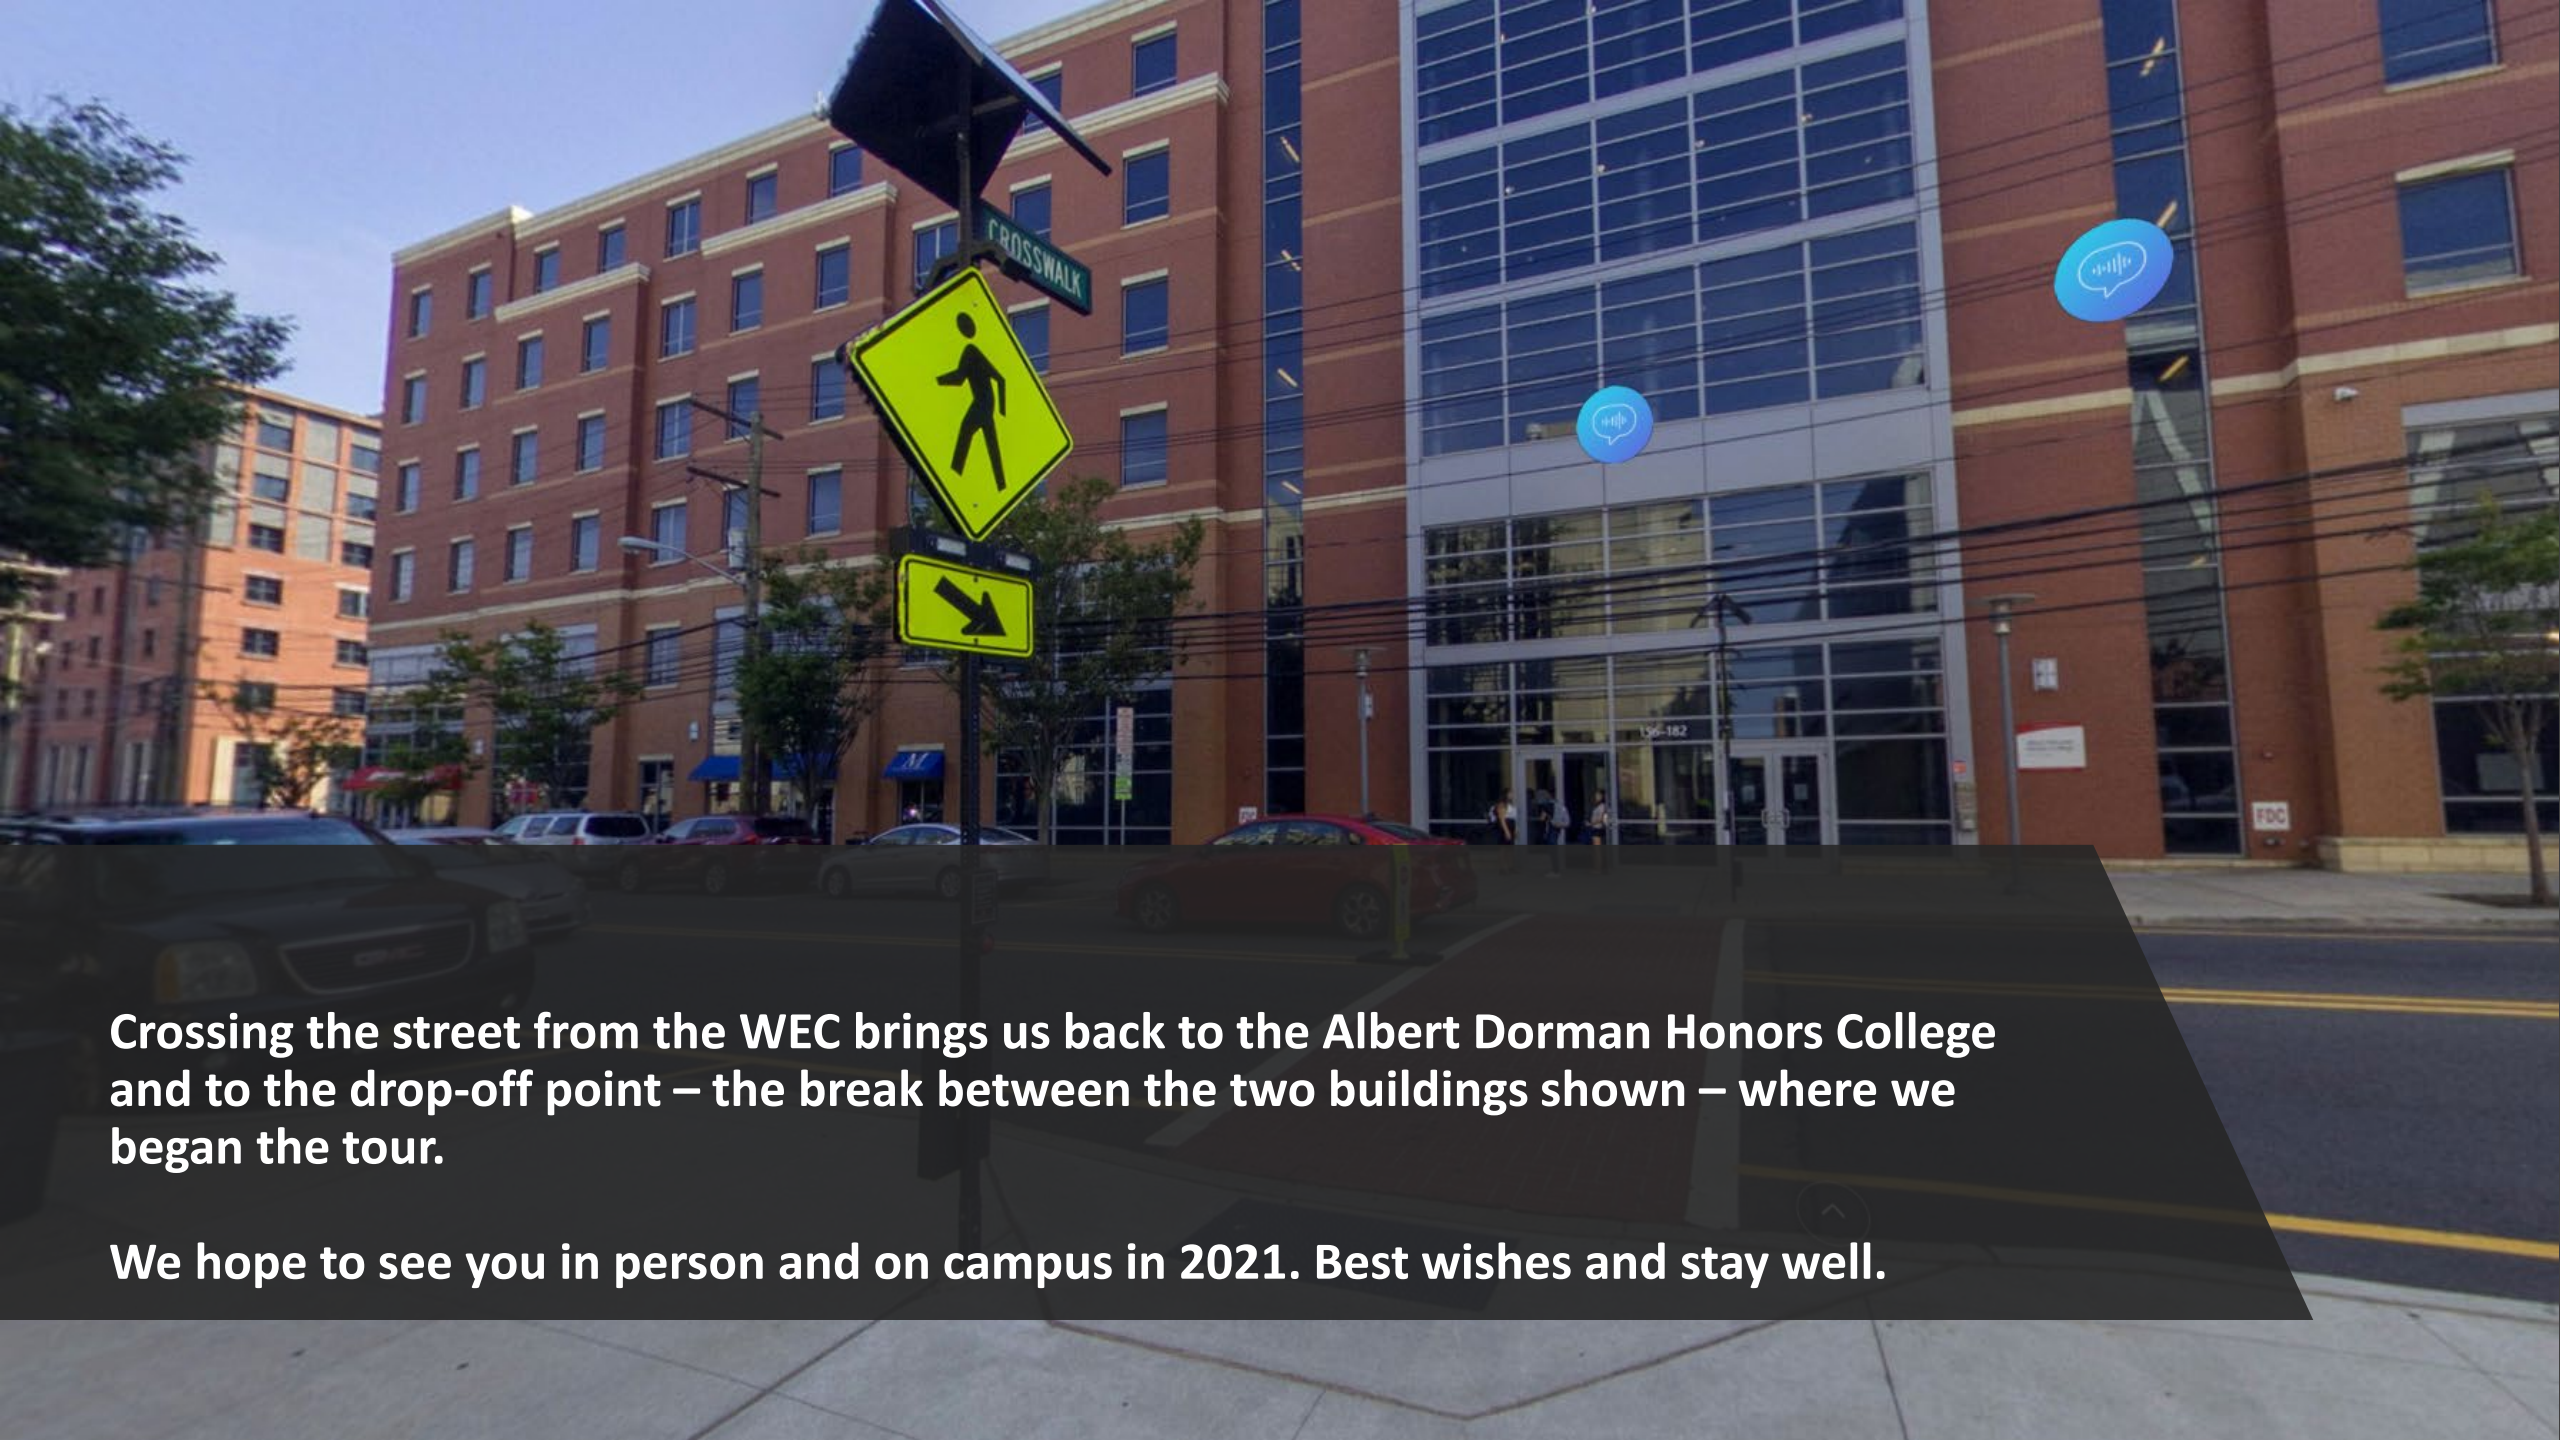

With our backs to the Makerspace, we walk past several more NJIT dorms to the Naimoli Tennis Center, our soccer field and, in the background, our sensational new Wellness and Events Center (WEC), all recreation sites for our students.

Among many activities housed in the WEC, our students can use the Division I swimming pool and basketball courts.

Crossing the street from the WEC brings us back to the Albert Dorman Honors College and to the drop-off point – the break between the two buildings shown – where we began the tour.

We hope to see you in person and on campus in 2021. Best wishes and stay well.
