A. **OVERVIEW**

This policy establishes that all costs incurred for the same purposes and in like circumstances must be consistently identified as either direct cost only or indirect cost only.

In order to maintain consistency, this policy is applicable to all grants and contracts regardless of the source of funding.

B. **PURPOSE**

The purpose of this policy is to comply with the regulatory standards set forth in OMB Uniform Guidance 2 CFR 200, regarding direct costs.

C. **DEFINITIONS**

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Allocable</td>
<td>A cost is allocable to a project if the goods or services involved are chargeable or assignable to such project in accordance with the relative benefits received by the project.</td>
</tr>
<tr>
<td>Allowable</td>
<td>A cost is allowable to a project if it:</td>
</tr>
<tr>
<td></td>
<td>(1) is reasonable,</td>
</tr>
<tr>
<td></td>
<td>(2) is allocable to the specific project,</td>
</tr>
<tr>

### D. SPECIFIC REQUIREMENTS

1. **Direct Costs** (See 2 CFR 200.413) can be identified specifically with a particular project or another institutional activity and can be assigned to activities relatively easily with a high degree of accuracy. In general, an expense may be charged to a project as a direct cost if it meets the following criteria:

   a. The expense is budgeted as a direct cost and accepted by the sponsor; and

   b. The expense is institutionally consistent; and

   c. The expense is allocable, allowable and reasonable.

2. **Indirect Costs** (See 2 CFR 200.414) are those expenses incurred for common or joint objectives that cannot be readily and specifically identified with a particular project. Costs that generally fall into this category include general-purpose office equipment, routine office supplies, telephone charges, postage, etc.

   In certain cases, expenses normally categorized as indirect costs may be charged directly to the project. In these cases the following additional documentation is required:

   a. The project has a special need for the item or service that is justified in the grant/contract proposal.

   b. The cost can be specifically identified to the work conducted under the project.

   c. The cost is specified in the proposed budget of the sponsored agreement.
d. The sponsoring agency accepts the cost as part of the project's direct cost budget.

For programs that only require a modular budget submission to the sponsoring agency, a detailed budget for the entire project must be submitted to OR.

3. **Proportional Benefit Rule – Definition and Application**

Under some circumstances, a direct expense may benefit and may be specifically identifiable with two or more sponsored projects, or sponsored projects and other activities, in proportions that can be reasonably determined. In those cases, the cost should be allocated based on the proportional benefit to each project. If a cost benefits two or more activities in proportions that cannot be determined because of the interrelationship of the work involved, the costs may be allocated or transferred to the benefitted activities on any reasonable basis that is consistent with these guidelines.

When the proportional benefit rule is used, the required close linkage of the cost with a sponsored activity continues to apply. The criteria for allocation of costs to two or more projects are as follows:

a. The costs in question should be specifically identifiable with the sponsored projects and other activities with a high degree of accuracy; and

b. Documentation of this identification and the methodology used to assign amounts to the projects must be available.

4. **For personnel costs** that directly benefit two or more sponsored projects, the proportional benefit rule is applied when the PI authorizes the distribution of salaries and wages and associated fringe benefits across two or more sponsored projects.

a. The PI should document his/her best judgment of the proportional benefit of the salaries and wages and associated fringe benefits to each project.

b. The time and effort certification process should confirm that the distribution of actual salaries and wages reflects the appropriate proportional distribution of compensation.

5. **For non-personnel costs** that directly benefit two or more sponsored projects, the proportional benefit rule can be used as long as:

a. The costs in question qualify as direct costs under these guidelines; and

b. The costs pay for something that specifically benefits two or more sponsored projects; and

   c. A proportional distribution of the costs can be reasonably documented.
6. **Unallowable Costs**

The charging of certain expenses to federally funded sponsored projects is expressly prohibited. Refer to University Policy 12-06 “Unallowable Cost”.

7. **Unacceptable Direct Costing Practices**

The following direct costing practices are unacceptable:

a. Assigning costs that are part of normal administrative activities, unless specifically allowed by the granting agency. (For example, charging salaries for departmental administration, faculty effort on proposal writing, etc.). See 2 CFR 200.413(c).

b. Allocation of charges to a sponsored project without establishing the direct benefit to that project.

c. Assigning charges to the sponsored project with the largest remaining budget balance.

d. Assigning charges to a sponsored project on the basis of ability to pay.

e. Charging budgeted amounts instead of the actual amounts incurred.

f. Describing costs as something other than what they are. (e.g., describing office supplies as lab supplies.)

g. Charging costs exclusively to a sponsored project when such costs are not charged to non-sponsored activities.

8. **Allowability of Costs**

The allowability of costs is determined in 2 CFR 200.420 through 2 CFR 200.475. Below are the most commonly used categories used by NJIT. For costs not described here, please refer to the exhaustive list in 2 CFR 200.

9. **Compensation**

The effort percentages in the project proposal should be used for initially charging salary costs to the project. However, adjustments should be made to the effort percentage and salary charge if use of the proposed effort percentage is inappropriate because of changes in an individual’s workload since submission of the proposal (e.g., the award of more grants than anticipated). If a change of 25 percent or more from the budgeted effort percentage occurs for a PI, co-PI or other key personnel, sponsoring agency notification and approval are required. (Note: this change is 25 percent of the budgeted effort percentage, not 25 percent of the individual’s total effort. For example, a reduction from 40 percent to 30 percent would be a 25 percent reduction of the budgeted effort percentage).
All direct effort on sponsored agreements must be confirmed by effort reports. Adjustments to the salary charges must be made if actual effort differs materially from the effort shown on the effort report.

If a salary exceeds the sponsoring agency salary cap, the salary amount exceeding the cap is unallowable.

10. Equipment (See 2 CFR 200.439)

Equipment means an article of nonexpendable tangible property. Special-purpose equipment, i.e., equipment that will be used only for research, medical, scientific or other technical activities, is allowable. General-purpose equipment means all other equipment, and is not allowable.

11. Office and Computer Supplies, Postage and Printing/Duplication (See 2 CFR 200.461)

Office and computer supplies, postage, printing and duplication costs are not allowable as direct charges to sponsored projects. These costs may sometimes be charged directly, with the approval of the sponsoring agency, such as in projects that involve large mail surveys.

12. Travel (See 2 CFR 200.474)

Travel is an allowable cost when directly attributable to specific work under a sponsored project. Refer to University Policy 12-08 “Travel and Business Expense”.

13. Business Meetings and Conferences (See 2 CFR 200.432)

Costs of meetings and conferences, whose primary purpose is the dissemination of technical information, are allowable direct charges to a sponsored project.

14. Meals

Meals are not allowable as a direct charge to sponsored projects unless approved by the sponsoring agency. Refer to University Policy 12-08 “Travel and Business Expense”.

15. Entertainment (See 2 CFR 200.438)

Costs incurred for social events and entertainment, such as meals, alcohol, lodging, rentals, transportation, and gratuities, are unallowable.
16. Consultants (See 2 CFR 200.459)

External consulting costs are allowable only when the approved budget provides for them. Consulting agreements must be negotiated by OR.

17. Maintenance and Repairs (See 2 CFR 200.452)

Normal maintenance, repairs or upkeep of equipment that neither adds to the value of the property nor appreciably prolongs its intended life is not allowable as a direct cost to the project.

18. Service Centers (See 2 CFR 200.468)

Service centers are departments or functional units that perform specific technical services primarily for the benefit of the University. Cost of services provided are allowable as direct costs to a sponsored project where such costs are required under the scope of the project. All usage must be accounted for and services must be charged to all users based on actual usage using uniform, non-discriminatory rates. The rates must be based on the actual direct costs of providing the services.

19. Telecommunication Charges

Normal telecommunication charges, fax charges, modem costs, cellular phones and other related costs, are not allowable as direct charges to sponsored projects. They may sometimes be charged, with the approval of the sponsoring agency, as direct costs in projects that involve large telephone surveys or field work or project related travel.

20. Membership Dues and Subscriptions (See 2 CFR 200.454)

Individual membership dues and subscriptions are not allowable as direct charges to sponsored projects.

21. Proposal Preparation Costs (See 2 CFR 200.460)

Costs of preparing proposals and applications for sponsor funding, including typing, copying, mailing, long distance telephone charges, etc., are not allowable.

22. Remodeling/Capital Improvements (See 2 CFR 200.462)

Construction, remodeling and alteration costs incurred specifically for a sponsored project are not allowable as direct costs unless approved by the sponsoring agency.
