A. OVERVIEW

Faculty Members and certain Instructional Staff working on sponsored research projects during the summer months are eligible to earn up to 1/3rd of their academic year salary. Instructional Staff and part-time employees are normally ineligible for summer research salary.

B. PURPOSE

The purpose of this policy is to establish uniform procedures regarding the summer period and pay for working on sponsored research projects.

C. DEFINITIONS

D. SPECIFIC REQUIREMENTS

1. Only for the purpose of this policy, the academic year is a period of 1,400 hours, consisting of 40 weeks at 35 hours per week, ending on the academic year end graduation date.

2. The summer research period starts the day after the academic year end graduation date. The total number of summer work hours will be 420 consisting of 12 work weeks at 35 hours per week (70 hours or 2 weeks equal a pay period).

3. Computations
   a. Summer Salary Computation: Academic Year Salary divided by 1/3rd.
   b. Summer Salary Hourly Rate Computation: Summer Salary divided by 420.

4. Summer salary is earned and paid over the same period as the summer research is performed. Effort expended during the academic year does not qualify for Sponsored Research Summer Salary. The most that can be earned in one pay period is the summer salary hourly rate multiplied by 70 hours.

5. If the sponsored research project ends prior to the end of the summer period, earnings can only be accumulated up until the end date of the sponsored research project.

6. An investigator who receives summer salary from sponsored projects, is not allowed time to write proposals, work on other research, or do significant administrative work beyond de minimis activity (e.g., brief consultation with graduate students not working on the sponsored project(s), handling brief non-project-related phone call or email, or attending an occasional administrative meeting) during the period for which the summer salary is received.

E. SUMMER RESEARCH PERSONNEL ACTION FORM

1. The criteria for faculty summer research pay eligibility are detailed below. The summer pay dates will be published annually in a memorandum.

2. Fully completed PAFs signed by the PI, and fully approved by the Department Head, Dean, and Vice Provost for Research, must be submitted to the Budget Department (579 Fenster Hall) no later than three Wednesdays prior to the initial pay date.

3. The PAF must clearly indicate:
   - the dollar amount to be paid
   - the six-digit Banner Finance index(es) to incur the expense
   - the summer research account code 614024
• the dates of the research effort
• a brief description of the effort corresponding to the summer research project.

F. SUMMER EFFORT REPORTING

Effort reporting is required for the portion of the summer that summer research salary is paid.

G. SPECIFIC AGENCY REQUIREMENTS

1. National Science Foundation (NSF)

   As a general policy, NSF limits salary compensation for senior project personnel to no more than **two months of their regular salary in any one year**. This limit includes salary compensation received from all NSF-funded grants.

2. National Institutes of Health (NIH)

   NIH will not allow requested summer salary above its published salary cap. If summer salary is requested above the salary cap, NIH will reduce that line item to the salary cap, resulting in a reduced total award amount.
