Update

A variety of proposals have been submitted as part of the State of NJ Bond initiative. An aspect of one of the proposals includes the modification of a significant number of classrooms on the NJIT campus to be more computer-enabled and computer-friendly. Proposed modifications include additional electricity and networking capabilities, ergonomic enhancements such as the ability to change desk layout as needed, as well as furniture choices, lighting, sound, security and curriculum changes. Many of these items are a direct result of the faculty and student focus group feedback.

NJIT-partnered Dell PC offerings for this coming fall are being streamlined, towards future BYOD implementation.
