ALBERT DORMAN HONORS COLLEGE

An Experiment That Works

“The overriding need in industry, in academia, and in government is for outstanding technically trained individuals who can integrate various disciplines and differing approaches.”

*Albert Dorman, '45, '99 HON
Founding Chairman, AECOM*

A decade ago, noted engineer and architect Albert Dorman challenged New Jersey Institute of Technology to undertake an uncommon experiment in higher education. Dorman Honors College was created to offer highly talented and motivated undergraduates an opportunity to achieve their full intellectual potential in a technology-rich, multi-disciplinary environment. The goal was to foster a new generation of innovators and entrepreneurs who could take a leading role in shaping the 21st century economy.

Begun as a pilot program in 1985 and launched as a college of the university in 1994, Dorman today enrolls more than 500 of the nation's most academically accomplished students with SATs in the top 10 percent nationally and with mathematics proficiency in the top two percent. The college builds on NJIT's rigorous curriculum, offering enriched coursework and seminars, as well as real-world projects with outstanding faculty researchers and industry leaders. Honors scholars are encouraged to design their own educational experiences, drawing from the university's rich resources in science and technology specialties. Many pursue dual degrees and minors to meet their career goals and interests.

More than 600 Dorman graduates have gone on to significant careers in industry and government, and to prestigious graduate and professional schools. They credit the Honors College as the catalyst that put them on the path to leadership opportunities in their careers and their communities. Dorman Honors College is, in the words of Dr. Richard S. Bowles, senior vice president, Global Quality Operations, Schering-Plough Corporation, who chairs Dorman's Board of Visitors, “an experiment that works.”

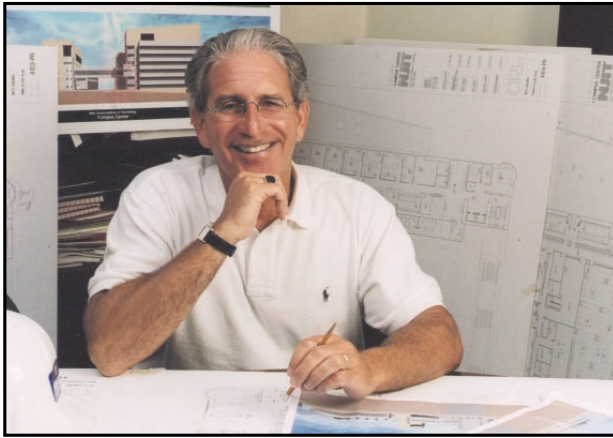

ALBERT DORMAN HONORS COLLEGE AT NJIT

A Challenging Educational Experience
That Stimulates Students To Test Their Limits.

Dorman Honors College scholars are among the nation's most talented young people. They come to NJIT with very focused ideas about their career goals and academic interests. Each Dorman student works one-on-one with an advisor to build an individual education plan, enriched by a variety of learning options such as independent study, research projects, industrial internships and service learning programs.

DR. JOEL BLOOM

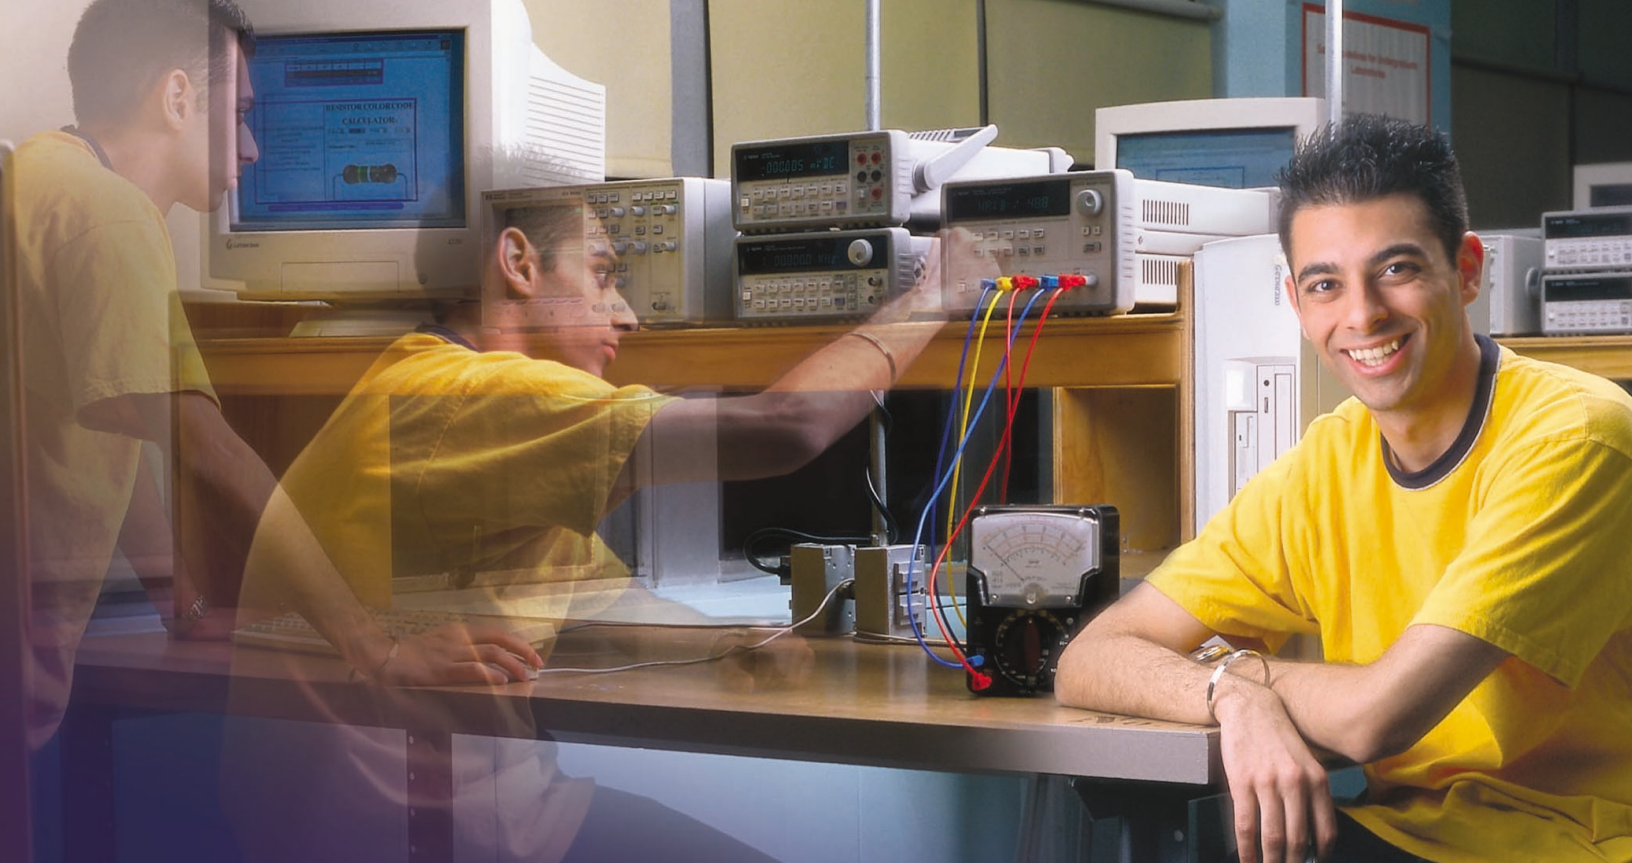

Dean of Albert Dorman Honors College

Albert Dorman is the ideal role model for NJIT honors students. He demonstrates many of the very qualities that the Honors College tries to instill in students: academic excellence, outstanding leadership abilities, and a firm commitment to the betterment of society.

A 1945 graduate of NJIT, Albert Dorman was elected to fellowship in both the American Institute of Architects and the American Society of Civil Engineers, as well as the National Academy of Engineers. He applied his engineering and architectural expertise to solving major planning, design, and construction problems around the world, providing leadership for one-of-a-kind or first-of-a-kind engineering projects that have become landmarks — bridges, tunnels, dams, ports and harbors, airports, educational and medical facilities, and military and industrial installations. He is well known for his humanitarian efforts and his leadership in urban planning, urban redevelopment and economic development

Dorman's record of continuous professional growth, remarkable achievement and public service makes him the perfect lodestar for Dorman honors scholars. We see our students as the future innovators and leaders of a technologically-based economy, and we work to help them develop the tools they will need. In addition to a firm foundation in the technological disciplines, our students learn to think critically and analytically, and to evaluate the social and ethical implications of their work. We encourage honors scholars to develop excellent communications skills and provide opportunities for them to work as part of a multi-disciplinary team and as team leader. Our students come to us creative, motivated and focused; they leave us highly competent professionals.

PAUL MANDER, JUNIOR
Major: Computer Engineering
Minor: Management

CAUSE:

Paul Mander is experiencing it all at NJIT – Honors colloquia and classes that give him a deep insight into his profession; an internship at Panasonic in which he tests new products, and volunteer service as president of the NJIT Student Ambassadors Club, which gives campus tours to visitors.

EFFECT:

“I have gained so many important life skills that have already proven valuable. I am comfortable speaking in front of groups, communicating with people in high positions, and providing leadership on teams. NJIT provides opportunities – to become a leader and to make connections – for those who wish to seize them.”

ALBERT DORMAN HONORS COLLEGE AT NJIT

A Technology-Rich Education to Foster a New Generation of Innovators and Entrepreneurs

Leadership in the next generation will fall to those who have mastered science and technology, those who understand how the many technological disciplines interact and complement each other, those who can project the impact of technology on society and industry. Success in any field – law, medicine, business, education, entertainment, finance and investment – now requires a command of technology.

DR. ROBERT A. ALTENKIRCH

President of NJIT

The mission of the Albert Dorman Honors College blends well with NJIT's overarching commitment to economic development. A thriving New Jersey economy is one of our most important priorities as the state's premier technological research university. A technology-based economy demands a highly skilled workforce armed with up-to-date knowledge and practical experience in the commercially promising technologies that will stimulate industrial growth and create new jobs. Through hands-on research opportunities in our state-of-the-art multidisciplinary centers and labs, our Dorman honors graduates are primed for success in the 21st century economy.

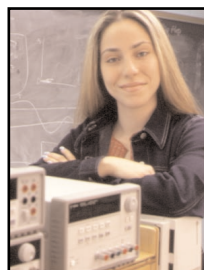

HONORS ALUMNUS

ERROL R.A. MAYNARD '01, '01 (B.ARCH., M.S. IN MANAGEMENT)

Architectural Intern, The Hillier Group

"My honors educational experience provided me with the valuable opportunities and challenging courses that have both broadened my horizons and instilled in me the concept of thinking beyond the box."

HONORS ALUMNA

CARLA MOUAKKAR '01 (B.S. IN ELECTRICAL ENGINEERING)

Management Trainee, Merrill Lynch Executive Leadership Program

"My Honors College education helped me to mature in more ways than just academics. I was exposed to new technologies and they opened my eyes to many new career opportunities."

NICOLE FUSCO, SENIOR

Major: Chemistry

CAUSE:

Nicole Fusco knows about making connections. There was her summer internship at L'Oreal, where she worked as a formulation chemist in the hair-dye lab. Then her professor asked for her help on a research project investigating heterogeneous catalysts. That led to Nicole giving a poster presentation on the results of her work at Bristol-Myers Squibb.

EFFECT:

"I've had many valuable experiences at NJIT that have deepened my interest in my field, and also helped me grow as a person. I used to be very shy, and I've learned to open up and pursue my interests with enthusiasm."

ALBERT DORMAN HONORS COLLEGE AT NJIT

A Well-Rounded Education That Emphasizes
Social Consciousness and Community Service

The Dorman Honors experience motivates students to look at the big picture. While involved in such projects as designing MEMS devices for medical diagnosis or conducting a feasibility study, students learn to consider their work in the context of its contribution to quality of life, its social and economic impact, its environmental consequences.

ALBERT DORMAN '45

Founding Chairman, AECOM

“Our Honors scholars are an outstanding group of young men and women, part of the precious intellectual resources of our country. They will become outstanding professionals and managers who can provide leadership to others outside their fields, who can build teams to successfully accomplish complex programs and to manage difficult research. I believe that the overriding need in industry, in academia, and in government is for outstanding technically trained individuals who can integrate various disciplines and differing approaches, and most importantly, can integrate the talents of creative, opinionated and stimulating individuals.”

HONORS ALUMNA

EMILY HSU '99 (B.S. IN SCIENCE, TECHNOLOGY AND SOCIETY)

Global Information Solutions

Johnson & Johnson Pharmaceutical Research and Development

“The small classes, the fast pace, the personal attention from the professors and the eagerness of the students really makes Dorman a rigorous college. A lot of the students were talented but had financial need, and Dorman, by granting needed scholarships, gave them a chance to pursue their dreams of becoming engineers, architects or computer scientists.”

CORINA GUSHARD, SOPHOMORE

Major: Mechanical Engineering

Minor: Management

CAUSE:

As a member of the Student Senate, Corina Guishard has experienced cause and effect in action on the NJIT campus. Involvement in campus life has resulted in Corina developing essential skills like the ability to think independently and to negotiate practical solutions.

EFFECT:

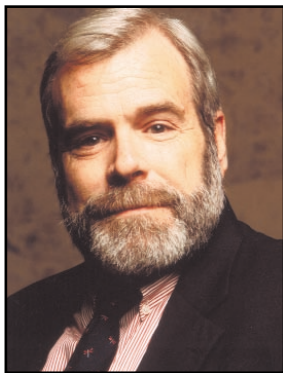

“The Senate presents students’ requests to the NJIT administration, and in turn, the administration responds quickly. Whether it’s placing more plants and benches on campus or adding summer classes, the administration does everything in its power to accommodate the academic and social needs of students. I’ve learned that if students make an effort, NJIT makes a difference for them, too.”

THE CAMPAIGN FOR ALBERT DORMAN HONORS COLLEGE

Endowing An Experiment That Works

The global economy has increased demand for multidisciplinary leaders who will not only anticipate change but will help shape society through their technological expertise. NJIT is responding to this demand by initiating the Albert Dorman Honors College Scholarship Endowment Campaign. This \$20 million fundraising effort will permit the Honors College to enroll an additional 100 students with competitive scholarship packages based on merit and need. The strengthened scholarship endowment will enable Dorman Honors College to recruit students with interests in the emerging technologies projected to have greatest impact on quality of life, our economy and the environment: biomedical engineering and biology; computer engineering; information systems and technology; and architecture.

By supporting this unprecedented effort, alumni and friends will ensure that NJIT remains one of the nation's most academically innovative public research universities.

RICHARD S. BOWLES

Senior Vice President for Global Quality Operations,
Schering-Plough Corporation

“The Board of Visitors after careful review has realized the opportunity to grow the Honors College in order to attract additional high achieving students. These exceptional students are receiving the highest quality education fully preparing them for our professions and graduate education. We need the support of alumni, industry, and others to develop this important resource of our state and nation.”

GIVING OPPORTUNITIES

You may support the Scholarship Endowment Campaign by choosing one of the following gift options:

- Cash Gifts and Pledges
- Gifts of Appreciated Securities
- Gifts of Real Property
- Planned Gifts

In addition, the Albert Dorman Honors College Scholarship Endowment Campaign offers an array of named gift opportunities including:

- Endowed Scholarships \$ 25,000 to \$1 million
- Departmental Honors Programs \$ 150,000
- Leadership Colloquium Series \$ 150,000
((\$25,000 to be earmarked for Series' expenses)
- Student/Faculty Research Fund \$ 100,000
- Facilities
 - Office Suite \$ 100,000
 - Conference Rooms (2) \$ 50,000 each
 - Project Rooms \$ 50,000
 - Terrace \$ 50,000
 - Wall of Donors Plaque \$ 25,000
- Saul K. Fenster
 - Exceptional Scholarship Fund \$ 10,000
(donor plaque recognition)

Please direct inquiries about the Scholarship Endowment Campaign to Charles R. Dees, vice president for University Advancement, 973-596-3400.

For information about Albert Dorman Honors College contact Dr. Joel Bloom, 973-596-6476.
