Orsted Bio

A U.S. clean energy leader, Ørsted develops, constructs, and operates offshore and land-based wind farms, solar farms, energy storage facilities, and bioenergy plants.

In the United States, the company has more than 700 employees and a growing portfolio of clean energy assets and partnerships. Ørsted holds the top position in offshore wind energy with approximately 5 gigawatts in development and operates America’s first offshore wind farm, located off the coast of Block Island. Ørsted has a total U.S. land-based capacity of 5 gigawatts across wind, solar, storage technologies and e-fuels.

Ørsted is developing New Jersey’s first offshore wind project, Ocean Wind 1. Located approximately 15 miles off the coast of southern New Jersey, Ocean Wind 1 is creating local jobs, manufacturing, and supply chain opportunities, and providing education and paid job training as a pathway to a career in the growing field of offshore wind.
