| Size and Type of Container   | Quantity | Purpose and Category of Waste Container<br><small>*please be specific*</small> | State of Contents<br>(Liquid / Solid) |
|------------------------------|----------|--|---------------------------------------|
| <b>Steel Closed Top</b>      |          | Solvents, pharma, non-hazardous liquids  |                                       |
| 30 gallon drum               |          |  | Liquids Only                          |
| <b>Steel Open Top</b>        |          | Special request only   |                                       |
| 30 gallon drum               |          |  | Solids Only                           |
| <b>Plastic Closed Top</b>    |          | Acids, bases, flammables, organics, inorganics                                 |                                       |
| 30 gallon drum               |          |  | Liquids Only                          |
| 5 gallon pail                |          |  | Liquids Only                          |
| <b>Plastic Open Top</b>      |          | Special Request Only   |                                       |
| 1 gallon pail                |          |  | Solids Only                           |
| 5 gallon pail                |          |  | Solids/Liquids                        |
| 15 gallon drum               |          |  | Solids Only                           |
| 30 gallon drum               |          |  | Solids Only                           |
| <b>Fiber Drum</b>            |          | Solid nonhazardous medical, contaminated PPE                                   |                                       |
| 30 gallon drum               |          |  | Solids Only                           |
| 15 gallon drum               |          |  | Solids Only                           |
| <b>Biological Waste</b>      |          | Gloves, plastic tools, no sharps, bio-contaminated                             |                                       |
| 5 gallon pail with red bag   |          |  | No Sharps                             |
| Medical box with red bag     |          |  |                                       |
| 15 gallon fiber with red bag |          |  | No Sharps                             |
| 30 gallon fiber with red bag |          |  | No Sharps                             |
| Sharps Containers            |          | Sharps   | Solids Only                           |
| <b>Broken Glass</b>          |          | Contaminated and non-contaminated  |                                       |
| 5 gallon pail                |          |  | Solids Only                           |
| 15 gallon drum               |          |  | Solids Only                           |

**PLEASE NOTE: SEPARATE THE WASTE UNLESS THEY ARE SIMILAR**

Ex: Do not store acids and flammables in the same container

Ex: All (empty) glass containers such as pipettes and bottles should go in the same container
