

Environmental Site Work in Lot 7 — Environmental Health and Safety

Beginning Monday, Nov. 16, environmental contractors will install a sub-surface equipment vault, associated with an existing environmental monitoring well, located in parking lot 7. Project preparation will begin with a utility mark out Friday, Nov. 13. Construction will begin the morning of Monday Nov. 16 and continue until the end of the day Wednesday, Nov. 18. During the three days of construction there will be a reduction in the number of available parking spots in lot 7 as well as an alternate traffic flow pattern required within the lot. At the conclusion, affected areas will be cleaned, repaired and repaved. The [linked diagram](#) depicts the project specifics. Questions may be directed to Mitchell Gayer, exec. director of Environmental Health and Safety at extension 5736 or gayer@njit.edu.
