

Financial Aid Curriculum Worksheet

The SAP Curriculum Worksheet is required for students whose SAP standards deficiencies include timeframe issues (the pace towards program completion). Students who are failing due to not meeting the 150% program completion timeframe, must build out their program demonstrating how the program will be completing in no more than 10 semesters (or 150% from the published program length). For example, for an undergraduate degree that takes 120 credits to complete, the maximum timeframe allowed in credits is $120 * 1.5$, or 180 credits, which is 6 academic years or 12 semesters. To determine whether the academic plan will be able to include completion within this timeframe, you are required to list all courses required to complete and what semester you plan to enroll for them. Please make sure to review with your academic advisor to determine if the plan is feasible.
