As we prepare for our upcoming reaccreditation by the Middle States Commission on Higher Education, I ask the entire university community to support the efforts of the Steering Committee and eight Working Groups. These groups have the difficult job of assessing our compliance with the MSCHE Requirements of Affiliation and Standards for Accreditation. A critical part of this effort is the collection of evidence to support our reaccreditation.

Members of the Working Groups will be reaching out to many departments across the university to request information including policies, procedures, reports, spreadsheets, and other evidence. I ask for your assistance in ensuring that these requests are fulfilled quickly and completely. All evidence will remain confidential and will be made available only to the Steering Committee, Working Groups, and the Middle States evaluation team.

If for any reason you are unable to comply with a request for evidence, or if you have any questions regarding how the evidence will be used, please contact Perry Deess (deess@njit.edu) as soon as possible to discuss. The reaffirmation of our accreditation is only possible with the support of all units across the university.

Thank you,

Fadi
