Grant Opportunity Alerts

Keywords and Areas Included in the Grant Opportunity Alert Section Below

NSF: Advanced Technological Education (ATE); Information and Intelligent Systems (IIS): Core Programs; Computer and Network Systems (CNS): Core Programs; Computing and Communication Foundations (CCF): Core Programs; Office of Advanced Cyberinfrastructure (OAC): Research Core Program; Joint DMS/NIGMS Initiative to Support Research at the Interface of the Biological and Mathematical Sciences (DMS/NIGMS); Energy, Power, Control, and Networks (EPCN); Electronics, Photonics and Magnetic Devices (EPMD); Communications, Circuits, and Sensing-Systems (CCSS); Innovation Corps - National Innovation Network Teams Program (I-CorpsTM Teams); Division of Physics: Investigator-Initiated Research Projects (PHY)

NIH: Mentored Career Development Award to Promote Faculty Diversity in Biomedical Research (K01); NIDCD Hearing Healthcare for Adults: Improving Access and Affordability (R21/R33 Clinical Trials Optional); Investigator Initiated Research in Computational Genomics and Data Science (R01 R21); High-Priority Behavioral and Social Research Networks (R24 Clinical Trial Not Allowed); Lab to Marketplace: Tools for Brain and Behavioral Research (R43/R44); BRAIN Initiative Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00)

Department of Defense/US Army/DARPA/ONR: Resilient Anonymous Communication for Everyone (RACE); FY2019 Office of Naval Research Young Investigator Program; Critical Technology Studies Program; Peer Reviewed Orthopaedic Research Program Applied Research Award; Research Interests of the Air Force Office of Scientific Research; DoD Orthotics and Prosthetics Outcomes, Clinical Research Award; NRL Long Range Broad Agency Announcement (BAA) for Basic and Applied Research

Department of Education: Institute of Education Sciences (IES)

Department of Energy: Integrated University Program (IUP)

NASA: ROSES 2018: Cassini Data Analysis Program: PDS Cassini Data Release 54; ROSES 2018: DSCOVER Science Team; Space Technology Research Institutes (STRI)Appendix; ROSES 2018: Heliophysics Space Weather Operations to Research

National Endowment of Humanities: Infrastructure and Capacity Building Challenge Grants

Pharma Foundation: Informatics: Student Award

Samsung: Samsung Global Research Outreach Program (GRO)

Simons Foundation: Simons Investigator program in the Mathematical Modeling of Living Systems (MMLS); Simons Foundation Fellowships in Math and Theoretical Physics

Graham Foundation: Architecture and Design Projects

Burroughs Wellcome Fund: Career Awards at the Scientific Interface

Merck: Merck Research Grants

Special Announcement

Institutional Review Board (IRB) Update on Renewal of Approval of Use of Human Subjects in Research

Continuing review (“renewal”)

As mandated by federal law, researchers must secure the IRB approval for all human subjects related scientific studies. Research plans must be subject to continuing review (“renewal”) no less than once per year (“expiration date”). Researchers are responsible for applying for renewal status at least a week in advance of the last IRB meeting before the expiration date (published in the IRB website) so as to allow the IRB to review and approve the renewal before the expiration date. If a research plan’s approval expires before the IRB completes its review, the researcher must stop all research procedures. The IRB has no legal authority to, and will not, retroactively approve any research plan. When stopping the research could place human subjects at risk, the researcher should contact the IRB immediately to obtain approval to continue treating subjects on that study.

Pending status in research proposals

Funding agencies often require research plans to be submitted for IRB approval prior to the proposal submission date, and to state the “pending approval” in the proposal. In these cases, researchers must secure a “pending status” before the proposal submission. The IRB has no legal authority to, and will not, date a research plan submission prior to the actual submission date to the IRB.

Non-research activities that involve human subjects

Activities that involve human subjects, which are not research activities as defined by the Code of Federal Regulations are not subject to IRB scrutiny (the IRB has no jurisdiction over them). Therefore, they require no review by the IRB.

Note that this is different from an exemption, which, under certain circumstances, applies to research activities involving human subjects.

The definition of research given in the Code of Federal Regulations is "Research means a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge. Activities which meet this definition constitute research for purposes of this policy, whether or not they are conducted or supported under a program which is considered research for other purposes."

Proposals involving an educational component often require the assessment of the proposed activities, and they do not meet the definition of research (in much the same way as the course evaluations are routinely carried out every semester are not considered research). If this is the case, the educational plan does not require IRB review. If, at any point in time, the PI decides to change the project description in this regard in any way that transforms the proposed activities into research, then the PI should contact the IRB and apply for IRB approval.

Call For Proposals

NJIT Faculty Seed Grant Awards – 2018-19

Proposal Submission Deadline to College/School Dean: September 5, 2018

Purpose:

NJIT "2020 Vision" strategic plan targets on substantial increase in academic research and external funding with faculty and student professional development. The purpose of the NJIT Faculty Seed Grant (FSG) initiative is to promote academic research in the core and interdisciplinary areas by providing seed funding to obtain preliminary results or establish hypotheses for developing future grant proposals for submission to external funding agencies. The FSG initiative specifically seeks seed funding proposals from faculty to launch new initiatives in core and interdisciplinary emerging areas aligned with NJIT strategic tactics to develop critical research mass.

Eligibility and Type of Awards:

NJIT full-time faculty with specific research initiative to enhance the critical mass in key and emerging areas may apply to FSG program for internal funding with a budget of \$7500 per project over the FY18 ending June 30, 2018. Multidisciplinary projects with strong recommendation and justification from College/School Dean will be considered at the funding level of \$10,000 subject to availability of funds.

It is expected that about 20 FSG awards will be made this year. Funding is arranged through the Offices of Research and College/School Deans.

Recipients of FSG as lead faculty are not eligible to receive another FSG award as lead faculty within three years from the last FSG award. Projects funded by FSG are not eligible to receive another FSG as

the intent of internal seed funding is to facilitate initial research towards obtaining external funds to pursue research.

Allowable Expenses include Project supplies and small equipment, travel to conferences and/or funding agencies, travel expenses for funding agency people to visit NJIT, student hourly wages. Faculty summer salary, AY release and any stipend are not permitted in the budget.

Deadlines:

CFP Announcement: June 1, 2018

FSG Proposal Due in the Office of College/School Dean: September 5, 2018

College/School Dean Recommendations to Office of Research: September 15, 2018

Institutional Review and Announcement of Awards: September 21, 2018

Period of Award: October 1, 2017– June 30, 2018 (no extension will be available)

Review Process and Criterion:

All Proposals will be reviewed within the College/School to which PI is affiliated. College/School Dean will make the recommendation of top ranked proposals based on the reviews from the College/School review committee, which will be forwarded to the Office of Research for further review and discussion with Deans leading to the announcement of awards.

Review criterion primarily includes the scientific merit of the proposal, and potential of external funding. Additional criterion includes significance of project goals, fit to the NJIT strategic research clusters and emerging trends towards developing critical mass in key areas, justification of internal funding, expected outcomes, and faculty expertise.

Other Requirements: Faculty receiving FSG awards will submit a full proposal to external funding agencies within six months from the end date of the award. They will also participate in the NJIT Faculty Research Showcase and Panel Discussion events in Spring semester.

Required FSG Proposal Format:

The main proposal (sections 2-7 in the required FSG proposal format below) is limited to 5 pages with single spaced 12 point font size. The page limit does not include the cover sheet, budget and budget justification (maximum one page) and list of references (maximum one page). In addition up to 2 pages of biographical sketch and 1 page of current and pending support are required for PI and each investigator. Please see the proposal format guidelines below.

The main proposal should have the following sections:

1. Cover Sheet:

Title of the Project

Principal and Co-Principal Investigators

Department

College

Date Submitted

PI and Co-PI (if multiple investigators) Signatures

2. Abstract (Maximum 250 words; Non-IP for public dissemination):

(Please summarize briefly on):

- a. Project Goal(s)
- b. Significance
- c. Expected Outcomes
- d. Justification of Internal Funding

3. Specific Objectives

4. Methods and Procedures

5. Evaluation and Deliverables

6. Future Plans

(Describe how the project funding with the deliverables will help in future proposal submissions, enhancing the research synergy, and obtaining external funds)

7. Justification of Internal Funding

(Describe what other funds are available and why additional internal funding is needed)

8. Budget and Budget Justification (maximum 1 page)

9. References (maximum 1 page)

10. Appendix (for PI and each Co-PI/Investigator):

- a. PI Biographical Sketch (NSF/NIH or Federal Agency Format; maximum 2 pages per investigator)
 - b. Other Grant Support (maximum 1 page per investigator; summarize specific project goal(s) for each grant and any overlap with this proposal)
-

Recent Research Grant and Contract Awards

Congratulations to faculty and staff on receiving research grant and contract awards!

PI: Haimin Wang (PI), Jing Wu (Co-PI), Chang Liu (Co-PI), Vasyl Yurchyshyn (Co-PI)

Department: Center for Solar Terrestrial Research

Grant/Contract Project Title: Data-Constrained, Data-Driven and Laboratory-Tested MHD Simulations to Understand the Successful and Failed Solar Eruptions

Funding Agency: NASA

Duration: 06/23/17-06/22/20

PI: Wenda Cao (PI)

Department: Center for Solar Terrestrial Research

Grant/Contract Project Title: Synoptic Investigations of the Sun Using SOLIS of NSO

Funding Agency: NASA

Duration: 10/01/17-09/30/21

PI: Bharat Biswal (PI)

Department: Biomedical Engineering

Grant/Contract Project Title: CRCNS: Deciphering the laminar-specific functional connectivity and its vascular and neural correlates

Funding Agency: NIH

Duration: 08/01/18-07/31/19

In the News...

(National and Federal News Related to Research Funding and Grant Opportunities)

Future Flying Cars: Georgia Tech professor John-Paul Clarke, along with witnesses from NASA, Uber, and elsewhere will appear before the House Science, Space, and Technology Committee next week at a hearing to examine "the potential benefits and challenges of 'flying cars' or vertical take-off and landing (VTOL) aircrafts from a public and private sector perspective, including discussion of when such technology may be commercially available." See the [hearing live](https://science.house.gov/legislation/hearings/full-committee-hearing-urban-air-mobility-are-flying-cars-ready-take). <https://science.house.gov/legislation/hearings/full-committee-hearing-urban-air-mobility-are-flying-cars-ready-take>

Energy Department Announces \$3.6 Million in Machine Learning for Geothermal

Energy: The Energy Department on July 19 announced up to \$3.6 million for 4-6 projects that will focus on early-stage R&D applications in machine learning to develop technology improvements in exploration and operational improvements for geothermal resources. The rapidly advancing field of machine learning offers substantial opportunities for technology advancement and cost reduction throughout the geothermal project lifecycle, from resource exploration to power plant operations.

Through this funding opportunity announcement (FOA), DOE's Office of Energy Efficiency and Renewable Energy Geothermal Technologies Office (GTO) will fund projects to support new analytical tools for finding and developing geothermal resources, to establish the practice of

machine learning in the geothermal industry, and maximize the value of the rich datasets utilized in the geosciences. GTO will provide funding in two areas:

- Topic 1: Machine Learning for Geothermal Exploration - GTO seeks projects that advance geothermal exploration through the application of machine learning techniques to geological, geophysical, geochemical, borehole, and other relevant datasets. Of particular interest are projects that will identify drilling targets for future work.
- Topic 2: Advanced Analytics for Efficiency and Automation in Geothermal Operations - GTO seeks projects that apply advanced analytics to power plant and other operator datasets, with the goal of improving operations and resource management.

For consideration of full application, applicants must submit their concept paper by 5 p.m. ET on Aug. 23, 2018 to be eligible to submit a full application. View the [FOA and submission instructions](#).

Transforming the CMMI Advanced Manufacturing Core Programs to Revitalize the Nation's Strategic Industries:

The National Science Foundation has changed its description of the Advanced Manufacturing Cluster "to remove the appearance of intellectual boundaries between topics foundational to advanced manufacturing research, and to encourage principal investigators (PIs) to incorporate challenges and convergent approaches outside the customary manufacturing portfolio to broaden the impact of America's advanced manufacturing research. Research areas will span the full range of advanced manufacturing to build new science leading to fundamental changes and improvements in manufacturing. Innovative proposals which transcend or cross domain boundaries are encouraged." See the [Dear Colleague Letter](#) on https://www.nsf.gov/pubs/2018/nsf18091/nsf18091.jsp?WT.mc_id=USNSF_25&WT.mc_ev=click Potential research areas include:

- Manufacturing at all length scales, from nano-to-macro, enabling new paradigms in material processing and structure formation;
- New processes and processing regimes utilizing novel processing conditions - often at the extremes of current conditions or using externally imposed fields;
- Integration of machine learning with manufacturing;
- Materials processing offering unprecedented control and range of the microstructures and properties;
- Surface and interface engineering allowing new engineering structures or levels of performance;
- Innovations in manufacturing machines and processes;
- Cybermanufacturing research enabling leaps in the evolution of network-accessed manufacturing services;
- Processes extending the use of materials in forms beyond their accessed range such as in extreme environments; and
- Manufacturing of bio-incorporated and compatible structures.

Industry creating a 'robot reserve army': [CIO Dive](#) highlights [research](#) suggesting automation and AI will create a "robot reserve army" that would "cause 'stagnant wages and deindustrialization' instead of unemployment for developing countries." The researchers, Lukas Schlogl and Andy Sumner of King's College London, argue that as simple tasks become more automatable, developing countries will see the largest impact as jobs there tend to "offer routine work and require little 'creative work.'" The authors contend that as robots take over jobs in the manufacturing sectors, new jobs in the service sector will emerge, but they see this trend as likely to "reduce wages and hinder the ability of people to break out of poverty."

DRONE PROPULSION: The panel calls on the Army "to invest in technologies that vastly improve the mechanical durability of unmanned aerial propulsion systems and utilize multi-fuel capable, hybrid electric propulsion." It urges the Army to consider accelerating expansion of its Open Campus approach to its Materials and Manufacturing Science laboratories in order to benefit strategic materials research. A "research priority" for the Navy should be the "development and qualification of materials technologies, including nonflammable electrolytes, to reduce the risk of thermal runaway and improve safety in lithium-ion batteries." The committee also notes that "all solid-state battery technology could dramatically increase the energy density of current batteries while providing a safer power system by eliminating the need for a flammable electrolyte and reducing the complexity of the battery management system."

\$2 BILLION MORE FOR NIH: In proposing a 5.4 percent increase for the National Institutes of Health, the Senate Appropriations majority crowed: "Since Republicans took back the Senate starting with the FY2016 appropriations cycle, the Committee has increased funding for NIH by \$9 billion or 30 percent." According to [the panel's report](#), the FY 2019 appropriation "is estimated to support over 11,400 new and competing grants." The panel's House counterpart proposed a \$1.25 billion raise.

NSF Highlights Materials Facilities: Specifically, they are the National High Magnetic Field Laboratory (NHMFL); the Cornell High Energy Synchrotron Source (CHESS); the Center for High Energy Neutron Scattering (CHRNS); ChemMatCARS; National Nanotechnology Coordinated Infrastructure (NNCI); Materials Innovation Platforms (MIP); and the Materials Research Facilities Network (MRFN). Read [the Division of Materials Research newsletter](#). Research supported by the Division of Materials Research (DMR) focuses on advancing fundamental understanding of materials, materials discovery, design, synthesis, characterization, properties, and materials-related phenomena. DMR awards enable understanding of the electronic, atomic, and molecular structures, mechanisms, and processes that govern nanoscale to macroscale morphology and properties; manipulation and control of these properties; discovery of emerging phenomena of matter and materials; and creation of novel design, synthesis, and processing strategies that lead to new materials with unique characteristics. These discoveries and advancements transcend traditional scientific and engineering disciplines. The Division supports research and education activities in the United States through funding of individual investigators, teams, centers, facilities, and instrumentation. Projects supported by DMR are essential for the development of future technologies and industries that meet societal needs, as well preparation of the next generation of materials researchers.

Webinar and Events

Event: Industry Day Webinar: Unmanned Systems Standardized Communications

Sponsor: NAC-DOTC

When: July 26, 2018; 10.00 AM – 11.00 AM

Website: <https://attendeegotowebinar.com/register/1036491311779815939>.

Brief Description: The Spectrum Consortium is hosting a webinar regarding **Unmanned Systems Standardized Communications**. They have extended the webinar invitation to NAC members. See below for more information: An industry day webinar has been scheduled for the JCAUS project, Unmanned Systems Standardized Communications, on July 26th, 2018 at 10:00am ET. The Joint

Communications Architecture for Unmanned Systems (JCAUS) project, funded separately from SAR&DP, was a developmental effort to define baseline architectures for unmanned systems' (UxS) communications. Based on lessons learned from that effort, the Government is developing principles and guidelines for the follow-on procurement.

The government plans to engage UxS and communications experts via the National Spectrum Consortium (NSC) to help define the optimal communications package architecture. This standardized architecture shall optimize the acquisition, operation, and reconfiguration of UxS communications. The primary purpose is to enable small unmanned systems to access spectrum in as agile a manner as possible. This effort is intended to engage the largest portion of the U.S. technology base in support of our government customers and their technology requirements.

Registration for the webinar can be found here: <https://attendee.gotowebinar.com/register/1036491311779815939>.

Event: Assessment of DERMS Deployment Under Various Operating Conditions

Sponsor: IEEE

When: July 27, 2018; 1.00 PM – 2.00 PM

Website: <https://smartgrid.ieee.org/assessment-of-derms-deployment-under-various-operating-conditions>

Brief Description: Under the California Electric Program Investment Charge (EPIC -1) project for Distributed Control for Smart Grid, San Diego Gas & Electric conducted a demonstration of various DERMS use cases. The demonstration consisted of the modeling of two SDG&E substations and feeders with an open tie and various downline DERs and devices. The software was written and delivered by Advanced Control Systems. The seminar will summarize the findings, benefits and recommendations related to a DERMS installation. The demonstration consisted of control of LTCs, Voltage regulators, capacitors, switches and DERs. The DERS were 2MW PV inverters with a 2MW energy storage unit, each operating with injection into the grid. Various use cases were demonstrated to study quiescent and stress operating states including failure modes, low and high DER injection modes, low and high load conditions, with the transition performance between each mode of operation. Three classical control technologies were compared and will be reported for each demonstration..

Speaker: Gary Ockwell, Advanced Control Systems

To join the webinar: Please register at <https://smartgrid.ieee.org/assessment-of-derms-deployment-under-various-operating-conditions>

Event: Computer and Network Systems (CNS) Core Program Solicitation Webinar

Sponsor: NSF

When: August 1, 2018; 2.00 PM – 3.00 PM

Website: <https://smartgrid.ieee.org/assessment-of-derms-deployment-under-various-operating-conditions>

Brief Description: CISE's Division of Computer and Network Systems (CNS) supports research and education projects that take a system-oriented approach to the development of novel computing and networking technologies, or to the enhancement of existing systems in any of several dimensions, or that explore new ways to make use of existing technologies.

The CNS core program deals with all aspects of computer and network systems. Society's reliance on such systems as infrastructure has grown dramatically in the last decade. At the same time, both the resources from which those systems are built—compute, storage, communication networks, and software—and the way those resources are organized and distributed, have continued to evolve rapidly.

Current and future systems need to satisfy various requirements, both generic and purpose-driven. General system requirements include security, reliability, manageability, usability, and sustainability, as well as cost-effectiveness and fitness for purpose. Depending on the context, other requirements may include performance, privacy-preservation, scalability, responsiveness, and survivability.

CNS solicits innovative research that considers technology trends and emerging challenges, while emphasizing a systems focus and awareness of the types of requirements mentioned above. This solicitation recognizes the interdependency and blurring of boundaries among computing, storage, and networking (sub)systems and the research associated with them. As such, specific sub-programs are not called out. It is not the intent to limit the scope of the program, compared to previous solicitations. Rather, the intent is to encourage cross-fertilization among areas of CNS research. This webinar will cover the CNS core program solicitation, [NSF 18-569](#), submission requirements and program updates.

To participate in the webinar, please register at: <https://nsf2.webex.com/nsf2/onstage/g.php?MTID=e8f585ddca7645d297ad08838864f2b7a> by 11:59pm EDT on Tuesday July 31, 2018.

Event: Office of Advanced Cyberinfrastructure (OAC): Research Core Program Webinar

Sponsor: NSF

When: August 7, 2018; 2.00 PM – 3.00 PM

Website: https://www.nsf.gov/events/event_summ.jsp?cntn_id=296101&org=NSF

Brief Description: The Office of Advanced Cyberinfrastructure (OAC) supports translational research and education activities in all aspects of advanced cyberinfrastructure (CI) that lead to deployable, scalable, and sustainable systems capable of transforming science and engineering research. Advanced CI includes the spectrum of computational, data, software, networking, and security resources, tools, and services, along with the computational and data skills and expertise, that individually and collectively can transform science and engineering. OAC supports advanced CI research to address new CI frontiers for discovery leading to major innovations, and supports the development and deployment processes, as well as expert services, necessary for realizing the research CI that is critical to the advancement of all areas of science and engineering research and education.

OAC research investments are characterized by their translational nature, i.e., building on basic research results and spanning the design to practice stages. They are further characterized by one or more of the following key attributes: multi-disciplinary, extreme-scale, driven by science and engineering research, end-to-end, and deployable as robust research CI. Areas of translational research supported by OAC include systems architecture and middleware for extreme-scale systems, scalable algorithms and applications, and the advanced CI ecosystem.

This webinar will cover the OAC core program solicitation, [NSF 18-567](#), submission requirements and program updates.

To participate in the webinar, please register at:

<https://nsf2.webex.com/nsf2/onstage/g.php?MTID=e18b1f392f8f79b6d6ef7c4521809180a>

by 11:59pm EDT on Tuesday August 6, 2018.

Event: Export Controls: When are Universities and Research Institutions Subject to the Export Administration Regulations?

Sponsor: US Commercial Service Global Education Team

When: August 28, 2018; 1.00 PM – 2.00 PM; Fee; \$25

Website: <https://emenuapps.ita.doc.gov/ePublic/event/editWebReg.do?SmartCode=8QFS>

Brief Description: When developing international partnerships or exchanges, or recruiting students and researchers, universities and research institutions should be aware of the Export Administration Regulations (EAR).

Although information and software that is published, or that is released by instruction in a catalog course or associated teaching laboratory of an academic institution, is not subject to the EAR, other technology may require a license for release.

- Exactly how might these regulations impact your educational institution's activities?
- How do you create a plan in order to become compliant with these regulations?

A representative from the Bureau of Industry and Security, U.S. Dept. of Commerce will explain concepts such as deemed export licenses and technology licenses, and will identify areas where an export license may not be required. Please share this webinar information with your research divisions.

To participate in the webinar, please register at:
<https://emenuapps.ita.doc.gov/ePublic/event/editWebReg.do?SmartCode=8QFS>

Event: Math Frontiers Monthly Webinar Series

Sponsor: National Academies

When: August 14, 2018 from 2.00 PM

Website: http://sites.nationalacademies.org/deps/bmsa/deps_183972

Brief Description: Join the National Academies of Sciences, Engineering, and Medicine for a webinar series on exciting and upcoming mathematics research across an array of topics. Webinars will take place on the **second Tuesday of each month from 2-3 p.m. ET**, with two speakers and live Q&A. See below for the list of dates and themes for each webinar. *When registering, please make sure you select all the webinars you would like to attend.* You will only receive reminder emails and login instructions for webinars you have registered for.

As each webinar approaches, we will post more information about the speakers on the webinar series page at nas.edu/mathfrontiers.

August 14, 2018: Algorithms for Threat Detection

Professor [Andrea Bertozzi](#) and others will discuss applications of mathematics to spatiotemporal data analytics as a way to discover and mitigate national security threats.

September 11, 2018: Mathematical Analysis

Professor [Dimitri Shlyakhtenko](#) and others will discuss mathematical analysis—the study of functions and their limits. Application areas include computational fluid dynamics and astronomy.

October 9, 2018: Combinatorics

Invited speakers will discuss the mathematical study of discrete structures and their properties focusing on some of the modern techniques in the area including the probabilistic method. Application areas include information theory, statistical physics, molecular biology and computer science.

November 13, 2018: Why Machine Learning Works

Invited speakers will discuss the mathematics behind machine learning and how they enable predictive analyses.

December 11, 2018: Mathematics of Epidemics

Professors [Calistus Ngonghala](#) and [Folashade B. Augusto](#) will discuss mathematical approaches to studying biology, including ecology and infectious disease.

To join the webinar: Please register at http://sites.nationalacademies.org/deps/bmsa/deps_183972

Grant Opportunities

National Science Foundation

Grant Program: Advanced Technological Education (ATE)

Agency: National Science Foundation NSF 18-571

RFP Website: <https://www.nsf.gov/pubs/2018/nsf18571/nsf18571.htm>

Brief Description: With an emphasis on two-year Institutions of Higher Education (IHEs), the Advanced Technological Education (ATE) program focuses on the education of technicians for the high-technology fields that drive our nation's economy. The program involves partnerships between academic institutions (grades 7-12, IHEs) and industry to promote improvement in the education of science and engineering technicians at the undergraduate and secondary institution school levels. The ATE program supports curriculum development; professional development of college faculty and secondary school teachers; career pathways; and other activities. The program invites research proposals that advance the knowledge base related to technician education. It is expected that projects will be faculty driven and that courses and programs credit bearing, although materials developed may also be used for incumbent worker education.

The ATE program encourages partnerships with other entities that may impact technician education. For example, with:

- the National Institute of Standards and Technology (NIST) Manufacturing Extension Partnerships (MEPs) (<https://www.nist.gov/mep>) as applicable to support technician education programs and the industries they serve;
- Manufacturing USA Institutes (<https://manufacturing.gov/>) and Investing in Manufacturing Communities of Practice (IMCPs) (<https://www.eda.gov/imcp/>) addressing workforce development issues (also see DCL [NSF 16-007](#)); and
- NSF Industry University Cooperative Research Centers Program (I/UCRC) awardees (<https://www.nsf.gov/eng/iip/iucrc/>).

The ATE program encourages proposals from Minority Serving Institutions and other institutions that support the recruitment, retention, and completion (certificate, degree, program) of students underrepresented in STEM in technician education programs that award associate degrees. NSF is particularly interested in proposals from all types of Minority Serving Institutions (including Hispanic Serving Institutions, Historically Black Colleges and Universities, Tribal Colleges and Universities, and Alaska Native and Native Hawaiian Serving Institutions) where the proportion of underrepresented students interested in advanced technology careers is growing.

Awards: Standard Grant **Anticipated Funding Amount:** \$60,000,000

Letter of Intent: Not Required

Full Proposal Submission Deadline: October 15, 2018

Contacts: V. Celeste Carter, Lead Program Director, DUE, W11126, telephone: (703) 292-4651, email: vccarter@nsf.gov

- Heather Watson, Co-Lead Program Director, W11247, telephone: (703) 292-7091, email: hwatson@nsf.gov

Grant Program: Information and Intelligent Systems (IIS): Core Programs

Agency: National Science Foundation NSF 18-570

RFP Website: <https://www.nsf.gov/pubs/2018/nsf18570/nsf18570.htm>

Brief Description: CISE's Division of Information and Intelligent Systems (IIS) supports research and education projects that develop new knowledge in three **core programs**:

- The Cyber-Human Systems (CHS) program;
- The Information Integration and Informatics (III) program; and
- The Robust Intelligence (RI) program.

Proposals in the area of computer graphics and visualization may be submitted to any of the three core programs described above.

Proposers are invited to submit proposals in three project classes, which are defined as follows:

- Small Projects - up to \$500,000 total budget with durations up to three years;
- Medium Projects - \$500,001 to \$1,200,000 total budget with durations up to four years; and

- Large Projects - \$1,200,001 to \$3,000,000 total budget with durations up to five years.

Awards: Standard Grant **Anticipated Funding Amount:** \$100,000,000

Letter of Intent: Not Required

Full Proposal Submission Deadline:

September 24, 2018 - October 02, 2018

LARGE Projects

September 24, 2018 - October 02, 2018

MEDIUM Projects

November 01, 2018 - November 15, 2018

SMALL Projects

Contacts: William S. Bainbridge, Point of Contact, Cyber-Human Systems (CHS), telephone: (703) 292-8930, email: wbainbri@nsf.gov

- James Donlon, Point of Contact, Robust Intelligence (RI), telephone: (703) 292-8930, email: jdonlon@nsf.gov
- Ephraim P. Glinert, Point of Contact, Cyber-Human Systems (CHS), telephone: (703) 292-8930, email: eglinert@nsf.gov

Grant Program: Computer and Network Systems (CNS): Core Programs

Agency: National Science Foundation NSF 18-569

RFP Website: <https://www.nsf.gov/pubs/2018/nsf18569/nsf18569.htm>

Brief Description: CISE's Division of Computer and Network Systems (CNS) supports research and education projects that take a system-oriented approach to the development of novel computing and networking technologies, or to the enhancement of existing systems in any of several dimensions, or that explore new ways to make use of existing technologies.

Proposers are invited to submit proposals in three project classes, which are defined as follows:

- Small Projects - up to \$500,000 total budget with durations up to three years;
- Medium Projects - \$500,001 to \$1,200,000 total budget with durations up to four years; and
- Large Projects - \$1,200,001 to \$3,000,000 total budget with durations up to five years.

Awards: Standard Grant **Anticipated Funding Amount:** \$60,000,000

Letter of Intent: Not Required

Full Proposal Submission Deadline:

September 24, 2018 - October 02, 2018

MEDIUM projects

November 01, 2018 - November 15, 2018

SMALL projects

Grant Program: Computing and Communication Foundations (CCF): Core Programs

Agency: National Science Foundation NSF 18-568

RFP Website: <https://www.nsf.gov/pubs/2018/nsf18568/nsf18568.htm>

Brief Description: CISE's Division of Computing and Communication Foundations (CCF) supports research and education projects that develop new knowledge in four core programs:

- The Algorithmic Foundations (AF) program;
- The Communications and Information Foundations (CIF) program;

- The Foundations of Emerging Technologies (FET) program; and
- The Software and Hardware Foundations (SHF) program.

Proposers are invited to submit proposals in two project classes, which are defined as follows:

- Small Projects - up to \$500,000 total budget with durations up to three years; and
- Medium Projects - \$500,001 to \$1,200,000 total budget with durations up to four years.

A more complete description of the two project classes can be found in section *II. Program Description* of this document.

CCF proposals must be in the Small or Medium classes only.

Awards: Standard Grant **Anticipated Funding Amount:** \$100,000,000

Letter of Intent: Not Required

Full Proposal Submission Deadline:

September 24, 2018 - October 02, 2018

MEDIUM projects

November 01, 2018 - November 15, 2018

SMALL projects

Contacts: Anindya Banerjee, Point of Contact, Software and Hardware Foundations (SHF), telephone: (703) 292-8910, email: abanerje@nsf.gov

- Mitra Basu, Point of Contact, Foundations of Emerging Technologies (FET), telephone: (703) 292-8910, email: mbasu@nsf.gov

Grant Program: Office of Advanced Cyberinfrastructure (OAC): Research Core Program

Agency: National Science Foundation NSF 18-567

RFP Website: <https://www.nsf.gov/pubs/2018/nsf18567/nsf18567.htm>

Brief Description: The Office of Advanced Cyberinfrastructure (OAC) supports translational research and education activities in all aspects of advanced cyberinfrastructure (CI) that lead to deployable, scalable, and sustainable systems capable of transforming science and engineering research. Advanced CI includes the spectrum of computational, data, software, networking, and security resources, tools, and services, along with the computational and data skills and expertise, that individually and collectively can transform science and engineering. OAC supports advanced CI research to address new CI frontiers for discovery leading to major innovations, and supports the development and deployment processes, as well as expert services, necessary for realizing the research CI that is critical to the advancement of all areas of science and engineering research and education.

OAC research investments are characterized by their translational nature, i.e., building on basic research results and spanning the design to practice stages. They are further characterized by one or more of the following key attributes: multi-disciplinary, extreme-scale, driven by science and engineering research, end-to-end, and deployable as robust research CI. Areas of translational research supported by OAC include systems architecture and middleware for extreme-scale systems, scalable algorithms and applications, and the advanced CI ecosystem. Principal investigators (PIs) are *strongly encouraged* to contact an OAC cognizant program director listed in this solicitation with a 1-page project summary for further guidance. For foundational computer and information science and engineering research, PIs are referred to the core research programs of the Computer and Communication Foundations (CCF), Computer and Network Systems (CNS), and Information and Intelligent Systems (IIS) divisions of CISE. Proposers are invited to submit proposals in one project class, which is defined as follows:

- Small Projects - up to \$500,000 total budget with durations up to three years.

Awards: Standard Grant **Anticipated Funding Amount:** \$7,500,000

Letter of Intent: See the program information

Grant Program: Joint DMS/NIGMS Initiative to Support Research at the Interface of the Biological and Mathematical Sciences (DMS/NIGMS)

Agency: National Science Foundation NSF 18-566

RFP Website: <https://www.nsf.gov/pubs/2018/nsf18566/nsf18566.htm>

Brief Description: The Division of Mathematical Sciences (DMS) in the Directorate for Mathematical and Physical Sciences (MPS) at the National Science Foundation (NSF) and the National Institute of General Medical Sciences (NIGMS) at the National Institutes of Health (NIH) plan to support fundamental research in mathematics and statistics necessary to answer questions in the biological and biomedical sciences. Both agencies recognize the need to promote research at the interface between mathematical and life sciences. This program is designed to encourage new collaborations, as well as to support innovative activities by existing teams.

Awards: Standard Grant **Anticipated Funding Amount:** \$5,000,000

Letter of Intent: See the program information

Full Proposal Submission Deadline: Full Proposal Accepted Anytime

Grant Program: Energy, Power, Control, and Networks (EPCN)

Agency: National Science Foundation NSF PD 18-7607

RFP Website:

https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=505249&org=NSF&sel_org=NSF&from=fund

Brief Description: The Energy, Power, Control, and Networks (EPCN) Program supports innovative research in modeling, optimization, learning, adaptation, and control of networked multi-agent systems, higher-level decision making, and dynamic resource allocation, as well as risk management in the presence of uncertainty, sub-system failures, and stochastic disturbances. EPCN also invests in novel machine learning algorithms and analysis, adaptive dynamic programming, brain-like networked architectures performing real-time learning, and neuromorphic engineering. EPCN's goal is to encourage research on emerging technologies and applications including energy, transportation, robotics, and biomedical devices & systems. EPCN also emphasizes electric power systems, including generation, transmission, storage, and integration of renewable energy sources into the grid; power electronics and drives; battery management systems; hybrid and electric vehicles; and understanding of the interplay of power systems with associated regulatory & economic structures and with consumer behavior.

Areas managed by Program Directors (please contact Program Directors listed in the [EPCN staff directory](#) for areas of interest):

Control Systems

- Distributed Control and Optimization
- Networked Multi-Agent Systems
- Stochastic, Hybrid, Nonlinear Systems

- Dynamic Data-Enabled Learning, Decision and Control
- Cyber-Physical Control Systems
- Applications (Biomedical, Transportation, Robotics)

Energy and Power Systems

- Solar, Wind, and Storage Devices Integration with the Grid
- Monitoring, Protection and Resilient Operation of Grid
- Power Grid Cybersecurity
- Market design, Consumer Behavior, Regulatory Policy
- Microgrids
- Energy Efficient Buildings and Communities

Power Electronics Systems

- Advanced Power Electronics and Electric Machines
- Electric and Hybrid Electric Vehicles
- Energy Harvesting, Storage Devices and Systems
- Innovative Grid-tied Power Electronic Converters

Learning and Adaptive Systems

- Neural Networks
- Neuromorphic Engineering Systems
- Data analytics and Intelligent Systems
- Machine Learning Algorithms, Analysis and Applications

Awards: Proposals submitted to other program announcements and solicitations, including the Faculty Early Career Development Program (CAREER), must meet their respective deadlines; please refer to the deadline dates specified in the appropriate announcement or solicitation. Proposals for EARly-concept Grants for Exploratory Research (EAGER) or Rapid Response Research (RAPID) can be submitted at any time but Principal Investigators must contact the cognizant program director prior to submission. Proposals for supplements or workshops can be submitted at any time, and PIs are encouraged to contact the cognizant PD prior to submission.

Letter of Intent: See the program information

Full Proposal Submission Deadline: Full Proposal Accepted Anytime

Grant Program: Electronics, Photonics and Magnetic Devices (EPMD)

Agency: National Science Foundation NSF PD 18-1517

RFP Website:

https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=505250&org=NSF&sel_org=NSF&from=fund

Brief Description: The Electronics, Photonics and Magnetic Devices (EPMD) Program supports innovative research on novel devices based on the principles of electronics, optics and photonics, optoelectronics, magnetics, opto- and electromechanics, electromagnetics, and related physical phenomena. EPMD's goal is to advance the frontiers of micro-, nano- and quantum-based devices operating within the electromagnetic spectrum and contributing to a broad range of application domains including information and communications, imaging and sensing, healthcare, Internet of Things, energy, infrastructure, and manufacturing. The program encourages research based on emerging technologies for miniaturization, integration, and energy efficiency as well as novel material-based devices with new functionalities, improved efficiency, flexibility, tunability, wearability, and enhanced reliability.

Awards: Proposals submitted to other program announcements and solicitations, including the Faculty Early Career Development Program (CAREER), must meet their respective deadlines; please refer to the deadline dates specified in the appropriate announcement or solicitation. Proposals for EARly-concept Grants for Exploratory Research (EAGER) or Rapid Response Research (RAPID) can be submitted at any time but Principal Investigators must contact the cognizant program director prior to submission. Proposals for supplements or workshops can be submitted at any time, and PIs are encouraged to contact the cognizant PD prior to submission.

Letter of Intent: See the program information

Full Proposal Submission Deadline: Full Proposal Accepted Anytime

Paul Lane plane@nsf.gov (703) 292-8339

Grant Program: Communications, Circuits, and Sensing-Systems (CCSS)

Agency: National Science Foundation NSF PD 18-7564

RFP Website:

https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=505248&org=NSF&sel_org=NSF&from=fund

Brief Description: The Communications, Circuits, and Sensing-Systems (CCSS) Program supports innovative research in circuit and system hardware and signal processing techniques. CCSS also supports system and network architectures for communications and sensing to enable the next-generation cyber-physical systems (CPS) that leverage computation, communication, and sensing integrated with physical domains. CCSS invests in micro- and nano-electromechanical systems (MEMS/NEMS), physical, chemical, and biological sensing systems, neurotechnologies, and communication & sensing circuits and systems. The goal is to create new complex and hybrid systems ranging from nano- to macro-scale with innovative engineering principles and solutions for a variety of applications including but not limited to healthcare, medicine, environmental and biological monitoring, communications, disaster mitigation, homeland security, intelligent transportation, manufacturing, energy, and smart buildings. CCSS encourages research proposals based on emerging technologies and applications for communications and sensing such as high-speed communications of terabits per second and beyond, sensing and imaging covering microwave to terahertz frequencies, personalized health monitoring and assistance, secured wireless connectivity and sensing for the Internet of Things, and dynamic-data-enabled autonomous systems through real-time sensing and learning.

Awards: Proposals submitted to other program announcements and solicitations, including the Faculty Early Career Development Program (CAREER), must meet their respective deadlines; please refer to the deadline dates specified in the appropriate announcement or solicitation. Proposals for EARly-concept Grants for Exploratory Research (EAGER) or Rapid Response Research (RAPID) can be submitted at any time but Principal Investigators must contact the cognizant program director prior to submission. Proposals for supplements or workshops can be submitted at any time, and PIs are encouraged to contact the cognizant PD prior to submission.

Jenshan Lin jenlin@nsf.gov (703) 292-8339

Akbar Sayeed asayeed@nsf.gov (703) 292-4753

Grant Program: Innovation Corps - National Innovation Network Teams Program (I-Corps™ Teams)

Agency: National Science Foundation NSF 18-515

RFP Website: <https://www.nsf.gov/pubs/2018/nsf18515/nsf18515.htm>

Brief Description: The National Science Foundation (NSF) seeks to develop and nurture a national innovation ecosystem that builds upon fundamental research to guide the output to facilitate the application of scientific discoveries closer to the development of technologies, products and processes that benefit society. In order to maintain, strengthen and grow a national innovation ecosystem, NSF has established the Innovation Corps - National Innovation Network Teams Program (I-Corps Teams). The NSF I-Corps Teams Program purpose is to identify NSF-funded researchers who will receive additional support in the form of entrepreneurial education, mentoring and funding to accelerate innovation that can attract subsequent third-party funding.

The purpose of the I-Corps Teams program is to identify NSF-funded researchers who will receive additional support in the form of entrepreneurial education, mentoring and funding to accelerate the translation of knowledge derived from fundamental research into emerging products and services that can attract subsequent third-party funding. The outcomes of I-Corps Teams projects will be threefold: 1) a clear go/no go decision based on an assessment of the viability of the overall business model, 2) substantial first-hand evidence for or against product-market fit, with a pithy definition of the customer segments and corresponding value propositions, and 3) a narrative of a compelling technology demonstration for potential partners.

Awards: Standard Grant **Anticipated Funding Amount:** \$12,750,000

Letter of Intent: See the program information

Full Proposal Submission Deadline: November 28, 2018

Contacts: Cindy WalkerPeach, telephone: 703 292-8437, email: crwalker@nsf.gov

Grant Program: Division of Physics: Investigator-Initiated Research Projects (PHY)

Agency: National Science Foundation NSF 18-564

RFP Website: <https://www.nsf.gov/pubs/2018/nsf18564/nsf18564.htm>

Brief Description: The Division of Physics (PHY) supports physics research and the preparation of future scientists in the nation's colleges and universities across a broad range of physics disciplines that span scales of space and time from the largest to the smallest and the oldest to the youngest. The Division is comprised of disciplinary programs covering experimental and theoretical research in the following major subfields of physics: Atomic, Molecular and Optical Physics; Computational Physics; Elementary Particle Physics; Gravitational Physics; Integrative Activities in Physics; Nuclear Physics; Particle Astrophysics; Physics of Living Systems; Plasma Physics (supported under a separate solicitation); and Quantum Information Science.

Awards: Standard Grant **Anticipated Funding Amount:** \$90,000,000

Letter of Intent: See the program information

Full Proposal Submission Deadline: November 28, 2018

National Institutes of Health

Grant Program: Mentored Career Development Award to Promote Faculty Diversity in Biomedical Research (K01 Independent Clinical Trial Not Allowed)

Agency: National Institutes of Health RFA-HL-19-026

RFP Website: <https://grants.nih.gov/grants/guide/rfa-files/RFA-HL-19-026.html>

Brief Description: The NIH recognizes a unique and compelling need to promote diversity in the biomedical, behavioral, clinical and social sciences workforce. The NIH expects efforts to diversify the workforce to lead to the recruitment of the most talented researchers from all groups; to improve the quality of the educational and training environment; to balance and broaden the perspective in setting research priorities; to improve the ability to recruit subjects from minority and other health disparity populations into clinical research protocols; and to improve the Nation's capacity to address and eliminate health disparities. For more information, see Notice of NIH's Interest in Diversity, [NOT-OD-18-129](#).

This program provides research development opportunities for non-tenured science faculty from diverse backgrounds, including those from underrepresented underrepresented groups. The research development program of the candidate should be based on the candidate's scholastic background, previous research experience, past achievements, and potential to develop into an independent research investigator.

Scientists and physicians with some research experience who need guided course work and supervised laboratory experiences, as well as faculty who need an intensive research experience under the guidance of an established scientist, are eligible to apply.

Awards: Award budgets are composed of salary and other program-related expenses, as described below. Application budgets must not exceed \$150,000 per year in direct costs. However, applications should reflect the actual needs of the proposed project.

Letter of Intent: Not required

Deadline: October 10, 2018, February 11, 2019, October 10, 2019, February 11, 2020, October 9, 2020, February 11, 2021, by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date

Grant Program: BRAIN Initiative: Integration and Analysis of BRAIN Initiative Data (R01 Clinical Trial Not Allowed)

Agency: National Institutes of Health RFA-MH-19-147

RFP Website: <https://grants.nih.gov/grants/guide/rfa-files/RFA-MH-19-147.html>

Brief Description: This FOA supports the development of software to visualize and analyze the data as part of programs of building the informatics infrastructure for the BRAIN Initiative. Other informatics programs include developing data standards that are needed to describe the new experiments that are being created by or used in the BRAIN Initiative ([RFA-MH-19-146](#)), and creating the data infrastructures that will house the data from multiple experimental groups ([RFA-MH-19-145](#)). Each of the programs is aimed at building an infrastructure that is used by a particular sub-domain of experimentalists rather than building a single all-encompassing informatics infrastructure now. Building the infrastructure one experimental area at a time will ensure that the infrastructure is immediately useful to components of the research community. As our understanding of the brain improves, it may be possible to create linkages between these various sub-domain specific informatics programs. Investigators of the informatics programs should keep that goal in mind and build for the future even though the current efforts are more limited in scope.

The data visualization and analysis tools supported under this FOA will make use of the standards and will be built so that they can be integrated into the data repositories, both of which are created in

awards under the other FOAs of the informatics programs. Similarly, the data repositories are expected to use the standards. Awardees under all the FOAs are expected to work together. The awardees should budget for hackathons and other collaborative efforts that will be necessary to integrate the products produced by all awardees. Collaborations with neuro-informatics efforts outside of the BRAIN Initiative are both welcome and are encouraged.

Awards: Application budgets are not limited but need to reflect the actual needs of the proposed project.

Letter of Intent: August 27, 2018

Deadline: September 27, 2018; March 7, 2019; September 6, 2019; March 6, 2020; September 9, 2020; March 4, 2021

by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

Grant Program: NIDCD Hearing Healthcare for Adults: Improving Access and Affordability (R21/R33 Clinical Trials Optional)

Agency: National Institutes of Health RFA-DC-19-001

RFP Website: <https://grants.nih.gov/grants/guide/rfa-files/RFA-DC-19-001.html>

Brief Description: This FOA requests research to increase accessible and affordable hearing health care (HHC). In this context, HHC refers broadly not only to hearing technology but also to the systematic and comprehensive hearing-related services involved in diagnosis, treatment, auditory rehabilitation, and counseling of individuals with hearing loss, as well as other services that collectively allow the individual to maximize his or her communication outcomes. The overarching emphasis is on the acquisition of knowledge that can be translated into new or enhanced approaches for HHC. Applications should focus on delivering better healthcare access and outcomes and should seek solutions that are effective, affordable, and deliverable to those in need. Research is needed to develop or test new and innovative adaptations of current approaches and practices. These adaptations should be implementable and sustainable in clinical and community practice settings beyond the research environment and may have the potential to address disparities in health care. Research applications may span HHC in the context of a medical model to a psychosocial model of hearing loss. Outcomes research and health services research related to accessible and affordable HHC are also responsive to this FOA. Because some aspects of this research area are new for the NIDCD scientific community, there will likely be a need to obtain preliminary data or conduct early-stage developmental activities before moving to a full-scale project. The Exploratory/Developmental Phased Innovation (R21/R33) grant mechanism is appropriate for this purpose. It provides opportunity for creating, developing, and strengthening new and necessary collaborations, provides opportunity for acquisition of preliminary data, and allows for milestone-driven research, supporting a phased research project with a stepped approach for implementation. Applications not requiring a phased research approach are encouraged to apply under a different funding mechanism (e.g., investigator initiated R21 or R01).

Awards: Support for the R21 phase cannot exceed two years and direct costs are limited to \$275,000 over the R21 two-year period, with no more than \$150,000 in direct costs in any single year of the R21 phase. The R33 phase may not exceed four years and direct costs are limited to \$1.4 M with no more than \$400,000 in direct costs in any single year of the R33 phase.

The total duration of the award (R21 and R33 phases) may not exceed five years.

Letter of Intent: September 4, 2018

Deadline: October 4, 2018, June 4, 2019, February 4, 2020, October 4, 2020, June 4, 2021, by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

Grant Program: Investigator Initiated Research in Computational Genomics and Data Science (R01 R21 Clinical Trial Not Allowed)

Agency: National Institutes of Health PAR-18-844

RFP Website: <https://grants.nih.gov/grants/guide/pa-files/PAR-18-844.html>

Brief Description: Through this FOA, NHGRI seeks to fund innovative research efforts in computational genomics, data science, statistics, and bioinformatics for basic or clinical genomic sciences, and broadly applicable to human health and disease, as well as research leading to improvement of existing software or approaches demonstrated to be in broad use by the genomics community.

Research topics appropriate for this FOA include, but are not limited to, development of novel computational, bioinformatics, statistical, or analytical approaches, tools, or software for:

- Interactive analysis and visualization of large genomic data sets.
- Identification or prioritization of disease-causal genetic variants.
- Causal statistical modeling related to genomic research.
- Analysis of single-cell or sub-cellular genomic data both in situ and in dissociated cells.
- Integrating model organism data and information with human data.
- Integrating and interpreting various genomic data types, including sequence data, functional data, phenotypic data, and clinical data.
- Processing and integrating genome sequence data to enhance representation of population variation.
- Processing sequence data for sequence assembly, variant detection (SNPs and SVs), imputation, and resolution of haplotypes.
- Development of efficient and scalable algorithms for compute-intensive genomic applications.
- Achieving major cost reductions in genomic data processing and analysis.
- Enabling scalable and cost-effective curation of FAIR metadata for genomic and phenotypic data.
- Enhancing secure sharing and use of genomic data in combination with clinical data.
- Processing or analyzing new genomic data types, or major improvement in processing or analyzing existing genomic data types.
- Rigorous benchmarking of tools, methods, or algorithms for genomics.
- Hardening an existing widely-used genomic data processing pipeline to enable its reproducible implementation by the biomedical research community.

Awards: Application budgets are not limited but need to reflect the actual needs of the proposed project.

Letter of Intent: 30 days prior to the application due date

Deadline: November 16, 2018; July 16, 2019; November 16, 2019; July 16, 2020; November 16, 2020; July 16, 2021, by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

Grant Program: High-Priority Behavioral and Social Research Networks (R24 Clinical Trial Not Allowed)

Agency: National Institutes of Health RFA-AG-19-015

RFP Website: <https://grants.nih.gov/grants/guide/rfa-files/RFA-AG-19-015.html>

Brief Description: This FOA is designed to address the network development needs of researchers interested in advancing transdisciplinary aging-relevant research agendas in the social and behavioral sciences. The goal is to produce resources that will serve the field at large. Applications must propose efforts to advance one of the above-listed high priority aging-relevant research areas in the behavioral and social sciences. Applications should prepare plans for new high impact activities that are not feasible with existing resources. For the purposes of this FOA, aging-relevant research is that which addresses issues of importance to the well-being and health of either mid-life or older adults and can include data spanning the entire life course. Applicants need not have a prior history of conducting research in aging.

Network support includes all activities designed to bring together leading scientists across disciplines and institutions to develop an emerging priority area. This program is intended to be flexible and support the creation of innovative networks that will propose activities and bring unique resources necessary to advance a set of well-articulated research goals. The application should be designed to have a substantial impact on the progress and quality of behavioral and social research of relevance to aging by virtue of the proposed activities. Networks are intended to serve the broader community of behavioral and social researchers engaged in aging-relevant research in the designated scientific area and are consequently unlikely to be limited to a single institution. Applications should propose activities designed to advance a field to the point of no longer requiring network support to sustain growth. Applicants should articulate criteria for assessing this progress.

Awards: Application budgets may not exceed \$250,000 per year in direct costs and need to reflect actual needs of the proposed project.

Letter of Intent: January 1, 2019

Deadline: February 1, 2019, by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on this date.

No late applications will be accepted for this Funding Opportunity Announcement.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date

Grant Program: Lab to Marketplace: Tools for Brain and Behavioral Research (R43/R44 - Clinical Trial Optional)

Agency: National Institutes of Health PAR-18-819

RFP Website: <https://grants.nih.gov/grants/guide/pa-files/PA-18-819.html>

Brief Description: This Funding Opportunity Announcement (FOA) encourages the translation of technologies for brain or behavioral research from academic and other non-small business research sectors to the marketplace. Encouraged from Small Business Concerns (SBCs) are Small Business Innovation Research (SBIR) grant applications that propose to further develop, make more robust, and make more user-friendly such technologies in preparation for commercial dissemination. It is expected that this activity will require partnerships and close collaboration between the original developers of these technologies and SBCs, which may be accomplished in any of a number of ways, including the use of multiple program directors/principal investigators.

Awards: Budgets of up to total \$450,000 per year total cost for Phase I awards and \$750,000 per year total cost for Phase II awards.

Letter of Intent: 30 days prior to the application due date

Deadline: [Standard dates](#) apply, by 5:00 PM local time of applicant organization.

*** Note new SBIR/STTR Standard Due Dates.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

Grant Program: BRAIN Initiative Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00 Independent Clinical Trial Not Allowed)

Agency: National Institutes of Health PAR-18-814

RFP Website: <https://grants.nih.gov/grants/guide/pa-files/PAR-18-814.html>

Brief Description: The objective of the NIH BRAIN Initiative Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00) is to help outstanding postdoctoral researchers from diverse backgrounds with the opportunity to complete needed, mentored training and transition in a timely manner to independent, tenure-track or equivalent faculty positions. The BRAIN Initiative Diversity K99/R00 program is intended to foster the development of a creative, independent researcher that will be competitive for subsequent independent funding and that will help advance the mission of the NIH and BRAIN Initiative research areas in particular. Applicants must have no more than 5 years of postdoctoral research experience at the time of the initial or the subsequent resubmission application. The K99/R00 award is intended for individuals who require at least 12 months of mentored research training and career development (K99 phase) before transitioning to the R00 award phase of the program. Consequently, the strongest applicants will require, and will propose, a well-conceived plan for 1–2 years of substantive mentored research training and career development that will help them become competitive candidates for tenure-track faculty positions and prepare them to launch robust, independent research programs. *An individual who cannot provide a compelling rationale for at least one year of additional mentored research training at the time of award is not a strong candidate for this award.*

Awards: Award budgets are composed of salary and other program-related expenses.

Letter of Intent: Not applicable

Deadline: The first due date is August 1, 2018; [Standard dates](#) apply after that, by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on these dates.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date

Grant Program: NIH Director's New Innovator Award Program (DP2 - Clinical Trial Optional)

Agency: National Institutes of Health RFA-RM-18-008

RFP Website: <https://grants.nih.gov/grants/guide/rfa-files/RFA-RM-18-008.html>

Brief Description: The [NIH Director's New Innovator Award](#) addresses two important goals: stimulating highly innovative research and supporting promising Early Stage Investigators. Early Stage Investigators may have exceptionally innovative research ideas, but not the preliminary data required to fare well in the traditional NIH peer review system. As part of NIH's commitment to increasing opportunities for Early Stage Investigators, it has created the NIH Director's New Innovator Award to support exceptionally creative Early Stage Investigators who propose highly innovative research projects with the potential for unusually high impact. This award complements ongoing efforts by the NIH and its Institutes and Centers to fund Early Stage Investigators through R01 grants and other mechanisms. The definition of Early Stage Investigator is provided [here](#).

The NIH Director's New Innovator Award is different from traditional NIH grants in several ways. It is designed specifically to support unusually creative investigators with highly innovative research ideas at an early stage of their career when they may lack the preliminary data required for an R01 grant application. The emphasis is on innovation and creativity; preliminary data are not required, but may be included. No detailed, annual budget is requested in the application. The review process emphasizes the individual's creativity, the innovativeness of the research approaches, and the potential of the project, if successful, to have a significant impact on an important biomedical or behavioral research problem.

Investigators who were not selected for an award in prior years may submit applications this year as long as they retain their ESI (early stage investigator) eligibility; however, all applications must be

submitted as “new” applications regardless of any previous submission to the program. No reference to any prior application may be included. Any reference to prior applications may be grounds for administrative withdrawal.

The NIH Director's New Innovator Award is part of the [High-Risk, High-Reward Research program](#) funded through the [NIH Common Fund](#), which supports cross-cutting programs that are expected to have exceptionally high impact. All Common Fund initiatives invite investigators to develop bold, innovative, and often risky approaches to address problems that may seem intractable or to seize new opportunities that offer the potential for rapid progress.

Awards: Application budgets are not limited but need to reflect the actual needs of the proposed project.

Letter of Intent: Not applicable

Deadline: September 21, 2018, by 5:00 PM local time of applicant organization. All [types of non-AIDS applications](#) allowed for this funding opportunity announcement are due on this date. No late applications will be accepted for this Funding Opportunity Announcement.

Applicants are encouraged to apply early to allow adequate time to make any corrections to errors found in the application during the submission process by the due date.

Department of Defense/US Army/DARPA/ONR

Grant Program: Resilient Anonymous Communication for Everyone (RACE)

Agency: Department of Defense DARPA HR001118S0052

Website:

<https://www.fbo.gov/index?s=opportunity&mode=form&id=1c268989fc5d242c2d94c4d45abd505d&tab=core&cview=1>

Brief Description: DARPA is soliciting innovative research proposals in the area of cryptographic and communication obfuscation techniques in order to build an anonymous, attack-resilient mobile communication system that can reside completely within a network environment.

The Resilient Anonymous Communication for Everyone (RACE) program will research technologies for a distributed messaging system that a) can exist completely within a given network, b) provides confidentiality, integrity, and availability of messaging, and c) preserves privacy to any participant in the system. Compromised system data and associated networked communications should not be helpful for compromising any additional parts of the system. RACE advances will be based on rigorous security arguments, such as those found in the academic cryptography community or statistical arguments based on realistic simulations. RACE will create advances in communication protocol encapsulation methods as well as efficient, oblivious, distributed system tasking, possibly via secure multiparty computation, to build a system that cannot be compromised even with limited participant compromises and largescale, real-time deep packet inspection. Approaches to preserving privacy are of interest, such as ubiquitous encryption, even during computation, and obfuscating communication protocols.

Awards: Total Funding Available: \$44,000,000

Proposal Deadline:

Proposers Day: July 24, 2018

o Abstract Due Date: August 14, 2018, 12:00 noon (ET)

o Proposal Due Date: September 18, 2018, 12:00 noon (ET)

o BAA Closing Date: September 18, 2018, 12:00 noon (ET)

Contact Information: BAA Coordinator RACE@darpa.mil

Grant Program: FY2019 Office of Naval Research Young Investigator Program

Agency: Department of Defense Office of Naval Research N00014-18-S-F009

Website: <https://www.onr.navy.mil/science-technology/directorates/office-research-discovery-invention/sponsored-research/yip.aspx>

Brief Description: The Office of Naval Research (ONR) is interested in receiving proposals for its Young Investigator Program (YIP). ONR's YIP seeks to identify and support academic scientists and engineers who are in their first or second full-time tenure-track or [tenure-track-equivalent academic appointment](#), who have received their doctorate or equivalent degree on or after 01 January 2011, and who show exceptional promise for doing creative research. The objectives of this program are to attract outstanding faculty members of Institutions of Higher Education (hereafter also called "universities") to the Department of the Navy's Science and Technology (S&T) research program, to support their research, and to encourage their teaching and research careers. Individuals who are holding non-profit equivalent positions are encouraged to apply.

Proposals addressing research areas described in the [ONR science and technology \(S&T\) department section](#) of ONR's website, which are of interest to ONR program officers and division directors will be considered. Contact information for each division (a subgroup of an S&T department) is also listed within that section. Potential applicants may contact the appropriate division director or the program officer who is the point-of-contact for a specific technical area, to discuss their research ideas. Brief informal pre-proposals may be submitted to facilitate these discussions. Such discussions can clarify the content and breadth of the priority research areas and enhance the match between a subsequent proposal and DoN research needs.

An individual wishing to apply for a Young Investigator award must submit a research proposal and at least one letter of support through the appropriate university officials. Applications received without a letter of support will be considered incomplete and will not be considered for award. ONR makes awards to institutions, not individuals. The research proposal should follow the format described in ONR funding opportunity announcement (FOA) N00014-18-S-F009, listed among [ONR's broad agency announcements](#), in Section IV titled, "Application and Submission Information."

Eligibility Requirements: Awards under this announcement will be made only to U.S. institutions of higher education which award degrees in science, engineering or mathematics. U.S. non-profit organizations operating primarily for scientific and educational services may also submit proposals. The principal investigator of a proposal must be a U.S. citizen, national or permanent resident (on the date proposals are due), holding a first or second full-time tenure-track or tenure-track-equivalent faculty position at that university, and has received his/her doctorate or equivalent degree on or after 01 January 2011. The term "national" of the United States includes a native resident of a possession of the United States, such as American Samoa.

Awards: Research proposed under the FY18 PRORP ARA may include small- to largescale projects. These awards are expected to yield potential health products, approaches, or technologies positioned for human testing. Upon successful completion, the proposed research is expected to yield knowledge products, approaches, or technologies that have the potential to advance toward clinical translation. Strong transition plans are expected. Applicants to the FY18 PRORP ARA are asked to consider, where appropriate, the inclusion of large animal studies in their research plan.

Proposal Deadline: Full Proposals: Friday, 31 August 2018 at 11:59 p.m. local Eastern time

Email: paula.barden.ctr@navy.mil

Grant Program: Critical Technology Studies Program

Agency: Department of Defense; Defense Intelligence Agency HHM402-18-FOA-399-A

Website: <https://intelligencecommunitynews.com/dia-to-provide-grants-for-critical-technology-studies-programs/>

Brief Description: The Department of Defense; Virginia Contracting Activity in conjunction with the Intelligence Community Centers for Academic Excellence is RE-SOLICITING VIA GRANTS.GOV proposal responses to HHM402-18-FOA-399-A Funding Opportunity Announcement for grant awards to build partnerships with accredited universities, colleges and institutions for higher education across the nation for Critical Technology Studies Program. Eligible institutions are encouraged to submit proposals that offer innovative ideas to establish/enhance a Center for Academic Excellence program which will create, attract, and sustain a robust and knowledgeable student applicants. Information on CAE program can be found at: <http://www.dia.mil/Training/ICCAE/>

HHM402-18-FOA-399-A solicitation documents are available ONLY at www.GRANTS.GOV; Instructions to access Grants.gov is as follows: www.grants.gov provides the Federal grant community a single internet site for finding and applying for grant funding opportunities. DIA requires applicant institutions to submit their FY 18 FOA proposal electronically through www.grants.gov/web/grants/applicants/apply-for-grants.html. Please carefully review the submission practices in www.grants.gov.

Awards: 3 years award; Award Ceiling: \$2,000,000; Anticipated Total Funding: \$10,000,000

Proposal Deadline: All submissions shall be received on or before 11:59 PM Eastern Standard Time August 3, 2018. The www.grants.gov portal will not accept proposals after the deadline.

Grant Program: Peer Reviewed Orthopaedic Research Program Applied Research Award

Agency: Department of Defense Dept. of the Army – USAMRAA W81XWH-18-PRORP-ARA

Website: <http://cdmrp.army.mil/funding/proprp>

Brief Description: An estimated 3,700 civilian amputations occur annually as a result of traumatic injury. In the military, extremity battle wounds comprise approximately 50% of injuries in the Joint Theater Trauma Registry. However, orthopaedic injuries and conditions that occur outside of combat (during training, leisure activities, resultant from old injuries, etc.) are the greatest threat to the readiness of our Service members and military. Early stabilization and treatment of orthopaedic injuries in both civilian and military populations have led to better outcomes, particularly in the prevention of secondary complications and in minimizing morbidity. Availability of orthopaedic care and treatment as early as possible, or as close to the point of injury as possible, also minimizes limb loss and loss of troop readiness. However, in potential future conflicts in rural areas, austere combat zones, or in mass casualty events, access to medical care may be delayed for hours, if not days or weeks.

The North Atlantic Treaty Organization (NATO) defines Prolonged Field Care (PFC) as field trauma care extended beyond doctrinal timelines until the patient can be transported from the point of injury to an appropriate level of care. PFC has been identified as the number one capability gap across the Army, and a major priority for other Services. Additional information regarding PFC can be found in the following documents: [http://www.wemjournal.org/article/S1080-6032\(17\)30063-7/pdf](http://www.wemjournal.org/article/S1080-6032(17)30063-7/pdf) and http://mrhc.amedd.army.mil/index.cfm?pageid=media_resources.articles.prolonged_field_care_the_new_normal.

Awards: Research proposed under the FY18 PRORP ARA may include small- to largescale projects. These awards are expected to yield potential health products, approaches, or technologies positioned for human testing. Upon successful completion, the proposed research is expected to yield knowledge products, approaches, or technologies that have the potential to advance toward clinical translation. Strong transition plans are expected. Applicants to the FY18 PRORP ARA are asked to consider, where appropriate, the inclusion of large animal studies in their research plan.

Proposal Deadline: Pre-Application Submission Deadline: 5:00 p.m. Eastern time (ET), July 30, 2018

- Invitation to Submit an Application: September 5, 2018
- Application Submission Deadline: 11:59 p.m. ET, October 24, 2018

Grant Program: Research Interests of the Air Force Office of Scientific Research

Agency: Department of Defense Air Force Office of Scientific Research FA9550-18-S-0003

Website: <http://www.federalgrants.com/Research-Interests-of-the-Air-Force-Office-of-Scientific-Research-71509.html>

Brief Description: The Air Force Office of Scientific Research manages the basic research investment of the U.S. Air force. As a part of the Air Force Research Laboratory (AFRL), our technical experts discover, shape, and champion research within AFRL, universities, and industry laboratories to ensure the transition of research results to support U.S. Air Force needs. Using a carefully balanced research portfolio, our research managers seek to foster revolutionary scientific breakthroughs enable the Air force and U.S. industry to produce world-class, militarily significant, and commercially valuable products.

Awards: Various; The FY18 appropriation is \$100M.

Grant Program: DoD Orthotics and Prosthetics Outcomes, Clinical Research Award

Agency: Department of Defense Dept of Army W81XWH-18-OPORP-CRA

Website: <https://www.arl.army.mil/www/default.cfm?page=8>

Brief Description: Applications to the FY18 OPORP Clinical Research Award (CRA) must address at least one of the Focus Areas listed below. Selection of the appropriate primary Focus Area is the responsibility of the applicant. Studies that propose development of a new technology or improvement of an existing technology are not allowed according to Congressional intent of the OPORP. • Orthotic or Prosthetic Device Form: Understand patient outcomes through the analysis and characterization of variables related to the form of currently available clinical options such as device size, shape, material, and/or configurations. • Orthotic or Prosthetic Device Fit: Understand patient outcomes related to human-device interface and component connection through the analysis of variables in currently available clinical options that facilitate fit-related metrics such as comfort and/or usability. • Orthotic or Prosthetic Device Function: Understand patient outcomes through the analysis of variables related to currently available device function such as device control, sensors, and passive or active response with respect to activities of daily living and other real-world activities.

Awards: Various; The FY18 appropriation is \$10M.

Proposal Deadline:

Pre-Application Submission Deadline: 5:00 p.m. Eastern time (ET), August 6, 2018 • Invitation to Submit an Application: September 5, 2018 • Application Submission Deadline: 11:59 p.m. ET, October 25, 2018

Contact Information: **Contact Information:** Questions related to Program Announcement content or submission requirements as well as questions related to the pre-application or intramural application submission through eBRAP should be directed to the CDMRP Help Desk, which is available Monday through Friday from 8:00 a.m. to 5:00 p.m. ET. Response times may vary depending upon the volume of inquiries. Phone: 301-682-5507 Email: help@eBRAP.org

Grant Program: NRL Long Range Broad Agency Announcement (BAA) for Basic and Applied Research

Agency: Department of Defense Naval Research Laboratory N00173-18-S-BA01

Website: <https://www.nrl.navy.mil/doing-business/Current-NRL-BAA>

Brief Description: The Naval Research Laboratory (NRL) The Naval Research Laboratory (NRL) is the Navy's corporate laboratory. NRL conducts basic and applied research for the Navy in a variety of scientific and technical disciplines. The basic research program is driven by perceptions about future requirements of the Navy. NRL conducts most of its research program at its own facilities but also funds some related research such as anticipated by this announcement. More extensive research support opportunities are available from the Naval Research Laboratory (NRL). NRL announcements may be accessed via the Internet at <https://www.nrl.navy.mil/doingbusiness/contracting-division/baa>. NRL is interested in receiving proposals for Long-Range Science and Technology (S&T) Projects which offer potential for advancement and improvement of Navy and Marine Corps operations. Readers should note that this is an announcement to declare NRL's broad role in competitive funding of meritorious research across a spectrum of science and engineering disciplines. A brief description of the NRL Program Codes and the science and technology thrusts that NRL is pursuing is provided below. Additional information can be found at the NRL website at <https://www.nrl.navy.mil/research/directorates-divisions/>. This announcement is an expression of interest only and does not commit the Government to make any award or to pay for any proposal preparation costs. The cost of proposal preparation for response to a BAA is not considered an allowable direct charge to any resultant contract or any other contract; however, it may be an allowable expense to the normal bid and proposal indirect cost specified in FAR 31.205-18.

Awards: Various

Proposal Deadline: May 9, 2019

Department of Education

Grant Program: Institute of Education Sciences (IES): Education Research CFDA Number 84.305A

Agency: Department of Education ED-GRANTS-052118-001

Website: <https://www.gpo.gov/fdsys/pkg/FR-2018-05-21/pdf/2018-10802.pdf>

Brief Description: Each funding opportunity description is a synopsis of information in the Federal Register application notice. For specific information about eligibility, please see the official application notice. The official version of this document is the document published in the Federal Register. Free Internet access to the official edition of the Federal Register and the Code of Federal Regulations is available on GPO Access at: <http://www.access.gpo.gov/nara/index.html>. Please review the official application notice for pre-application and application requirements, application submission information, performance measures, priorities and program contact information.

For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the Federal Register on February 12, 2018 (83 FR 6003) and available at www.gpo.gov/fdsys/pkg/FR-2018-02-12/pdf/2018-02558.pdf.

The dates when applications are available and the deadlines for transmittal of applications invited under this notice are indicated in the chart at the end of this notice and in the Requests for Applications (RFAs) that are posted at the following websites: <https://ies.ed.gov/funding>, <https://www.ed.gov/programs/edresearch/index.html>, and <https://www.ed.gov/programs/specialedresearch/index.html>.

Purpose of Program: In awarding these grants, the Institute of Education Sciences (Institute) intends to provide national leadership in expanding fundamental knowledge and understanding of (1) developmental and school readiness outcomes for infants and toddlers with or at risk for a disability, (2) education outcomes for all students from early childhood education through postsecondary and adult education, and (3) employment and wage outcomes when relevant (such as for students who engaged in career and technical, postsecondary, or adult education). The Institute's research grant programs are designed to provide interested individuals and the general public with reliable and valid information about education practices that support learning and improve academic achievement and access to education opportunities for all students. These interested individuals include parents, educators, students, researchers, and policymakers. In carrying out its grant programs, the Institute provides support for programs of research in areas of demonstrated national need.

Competitions in This Notice: The Institute will conduct nine research competitions in FY 2019 through two of its centers: The Institute's National Center for Education Research (NCER) will hold a total of five competitions--one competition in each of the following areas: Education research; education research and development centers; statistical and research methodology in education; partnerships and collaborations focused on problems of practice or policy; and low-cost, short-duration evaluation of education interventions.

Catalog of Federal Domestic Assistance (CFDA) numbers 84.305A, 84.305C, 84.305D, 84.305H, 84.305L, 84.324A, 84.324B, 84.324L, and 84.324N.

Awards: Up to \$4,000,000. Estimated total funding: \$115,000,000

Proposal Deadline: Aug 23, 2018 Application Package Available: June 21, 2018. Deadline for Transmittal of Applications: August 23, 2018

Department of Energy

Grant Program: Machine Learning for Geothermal Energy

Agency: Department of Energy DE-FOA-0001956

Website: <https://eere-exchange.energy.gov/>

Brief Description: The U.S. Department of Energy's Geothermal Technology Office (GTO) Machine Learning for Geothermal Energy funding opportunity announcement (FOA) supports projects that will develop new analytical tools for finding and developing geothermal resources and establish the practice of machine learning in geothermal operations. The rapidly advancing field of Machine Learning (ML) offers substantial opportunities for technology advancement and cost reduction throughout the geothermal project lifecycle, from resource exploration to power plant operations. Under this funding opportunity, GTO is interested in two topic areas:

Topic 1: Machine Learning for Geothermal Exploration - GTO seeks projects that advance geothermal exploration through the application of machine learning techniques to geological, geophysical, geochemical, borehole, and other relevant datasets. Of particular interest to GTO are projects that will identify data acquisition targets and build community datasets for future work.

Topic 2: Advanced Analytics for Efficiency and Automation in Geothermal Operations - GTO seeks projects that apply advanced analytics to power plant and other operator datasets, with the goal of improving operations and resource management.

For questions and answers pertaining to this FOA, please reference the DE-FOA-0001956 Machine Learning FAQ Log in FOA Documents.

The eXCHANGE system is currently designed to enforce hard deadlines for Concept Paper and Full Application submissions. The APPLY and SUBMIT buttons automatically disable at the defined submission deadlines. The intention of this design is to consistently enforce a standard deadline for all applicants.

Applicants that experience issues with submissions PRIOR to the FOA Deadline: In the event that an Applicant experiences technical difficulties with a submission, the Applicant should contact the eXCHANGE helpdesk for assistance (exchangehelp@hq.doe.gov). The eXCHANGE helpdesk and/or the EERE eXCHANGE System Administrators (eXCHANGE@ee.doe.gov) will assist the Applicant in resolving all issues.

Awards; Up to \$700,000; Available Funding: \$3,600,000

Submission Deadline: Concept Paper Submission Deadline: 8/23/2018 5:00 PM ET

- Full Application Submission Deadline: 11/1/2018 5:00 PM ET

Contact Information: EERE-ExchangeSupport@hq.doe.gov

For Exchange related support and issues.

For questions regarding the FOA

Grant Program: Integrated University Program (IUP): Enabling Technologies and Innovation (ETI) & Monitoring, Technology and Verification (MTV)

Agency: Department of Energy DE-FOA-0001875

Website: <https://www.fedconnect.net/FedConnect/default.htm>

Brief Description: The mission of the U.S. Department of Energy (DOE), National Nuclear Security Administration (NNSA), Office of Defense Nuclear Nonproliferation Research and Development (DNN R&D) is to support U.S. national and nuclear security objectives in reducing global nuclear security threats through the innovation of unilateral and multi-lateral technical capabilities to detect, identify, and characterize: 1) foreign nuclear weapons programs, 2) illicit diversion of special nuclear materials, and 3) global nuclear detonations. Section 313 of the Omnibus Appropriations Act of 2009 (H.R. 1105, P.L. 111-8) created the Integrated University Program (IUP). DNN R&D is one of the three participants in this program and is continuing a nuclear science and engineering program, including nuclear security, to support multi-year research projects. The role of Institutions of Higher Education (IHE; as defined in Section III.A. of the FOA) for nuclear security research and development is to innovate and develop some of the most challenging basic aspects of new technology and methods. Once these basic aspects have been proven at the IHE level, the DOE/NNSA National Laboratories and/or National Security Sites/Complexes can fulfill their unique role to perform mission-specific research and development that improves on capabilities until they are either adopted by operational enterprises or transitioned into private industry for commercialization. Transparently and effectively linking these IHE and DOE/NNSA National Laboratory and/or National Security Sites/Complexes roles represents the core of how DNN R&D proposes to meet its objectives. The intent of this FOA is to award TWO separate five-year cooperative agreements to consortia of accredited IHEs to allow them to receive and administer funds for student and faculty research, fellowships, and scholarship funding awarded by DOE/NNSA, DNN R&D. Each cooperative agreement will be awarded to a consortium of IHEs which will include the participation of DOE/NNSA National Laboratories and/or National Security Sites/Complexes as a consortium-member(s). Individual consortium-member IHEs shall make specific contributions and shall receive specified portions of the funding. The consortium may include student and research fellows and must have a long-term objective of building expertise in nuclear nonproliferation detection. Research results should be incorporated readily into IHE curricula. Students, faculty, and researchers must be able to work unencumbered while moving across what are now organizational and bureaucratic boundaries of the academic and governmental facilities engaged in the consortium, while properly protecting critical

information and materials. The consortium should establish reciprocal arrangements between the lead IHE and other IHEs as well as relationships with appropriate DOE/NNSA National Laboratories and/or National Security Sites/Complexes.

Awards; Up to \$25,000,000; Available Funding: \$50,000,000

Submission Deadline: Sep 04, 2018 Application deadline is September 4, 2018, 11:59PM Eastern Standard Time.

NASA

Grant Program: ROSES 2018: Cassini Data Analysis Program: PDS Cassini Data Release 54

Agency: NASA NNH18ZDA001N-CDAPR54

Website: <https://nspires.nasaprs.com/external/solicitations/summary.do?solId=%7BE10A322F-0907-1754-8893-15F97479CD52%7D&path=open&method=init>

Brief Description: This National Aeronautics and Space Administration (NASA) Research Announcement (NRA), Research Opportunities in Space and Earth Sciences (ROSES) – 2018, solicits basic and applied research in support of NASA’s Science Mission Directorate (SMD). ROSES is an omnibus NRA, with many individual program elements, each with its own due dates and topics. All together these cover the wide range of basic and applied supporting research and technology in space and Earth sciences supported by SMD. Awards will be made as grants, cooperative agreements, contracts, and inter- or intraagency transfers, depending on the nature of the work proposed, the proposing organization, and/or program requirements. The typical period of performance for an award is three years, but some programs may allow up to five years and others specify shorter periods. Organizations of every type, domestic and foreign, Government and private, for profit and not-for-profit, may submit proposals without restriction on teaming arrangements. Note that it is NASA policy that all research involving non-U.S. organizations will be conducted on the basis of no exchange of funds.

Grant Program: ROSES 2018: DSCOVER Science Team

Agency: NASA NNH18ZDA001N-DSCOVER

Website: <https://nspires.nasaprs.com/external/solicitations/summary.do?solId=%7B9C06DA13-5411-0043-725E-24CAB3A588F6%7D&path=open&method=init>

Brief Description: NASA’s Earth Science Research Program supports research activities that address the Earth system and seek to characterize its properties on a broad range of spatial and temporal scales, to understand the naturally occurring and human-induced processes that drive them, and to improve our capability for predicting its future evolution. The focus of the Earth Science Research Program is the use of space-based measurements to provide information not available by other means. NASA’s program is an end-to-end one that starts with the development of observational techniques and the instrument technology needed to implement them; tests them in the laboratory and from an appropriate set of in situ, surface-, ship-, balloon-, aircraft-, and/or space-based platforms; uses the results to increase basic process knowledge; incorporates results into complex computational models that can be used to more fully characterize the present state and future evolution of the Earth system; and develops partnerships with other national and international organizations that can use the generated information in environmental forecasting and in policy, business, and management decisions. The scientific documentation underlying

the Earth Science Research Program provides a comprehensive background for the science solicited here. The Research Program addresses NASA's Strategic Goal 2.1 to "Advance Earth System Science to meet the challenges of climate and environmental change." (See the most recent NASA Strategic Plan: https://smd-prod.s3.amazonaws.com/science-red/s3fspublic/atoms/files/FY2014_NASA_StrategicPlan_508c.pdf). In particular, it addresses the more specific Science Goals (see the Science Plan for NASA's Science Mission Directorate (hereafter the NASA Science Plan), also available at https://smdprod.s3.amazonaws.com/science-red/s3fspublic/atoms/files/2014_Science_Plan_PDF_Update_508_TAGGED_1.pdf)

Grant Program: ROSES 2018: Heliophysics Space Weather Operations to Research

Agency: NASA NNH18ZDA001N-HSWO2R

Website: <https://nspires.nasaprs.com/external/solicitations/summary.do?solId=%7BE17AD920-C9F2-600D-5913-6951AB56F31F%7D&path=open&method=init>

Brief Description: NASA's heliophysics strategic objective is to understand the Sun and its interactions with the Earth and the Solar System, including space weather. In this framework, the Heliophysics Research Program is guided by goals defined in the NASA 2014 Science Plan (available at <https://science.nasa.gov/about-us/science-strategy>) and the 2013 National Research Council Decadal Strategy for Solar and Space Physics report, Solar and Space Physics: A Science for a Technological Society (www.nap.edu/catalog.php?record_id=13060) and its purpose is to enable achieving these goals, which are: 1. Determine the origins of the Sun's activity and predict the variations in the space environment; 2. Determine the dynamics and coupling of Earth's magnetosphere, ionosphere, and atmosphere and their response to solar and terrestrial inputs; 3. Determine the interaction of the Sun with the Solar System and the interstellar medium; 4. Discover and characterize fundamental processes that occur both within the heliosphere and throughout the Universe. The Heliophysics Research Program seeks to understand phenomena, on a broad range of spatial and temporal scales, the fundamental processes that drive them, how these processes combine to create space weather events, and to enable a capability for predicting future space weather events. In concert with the other NASA science divisions (Planetary Science, Astrophysics, and Earth Science), the program shares responsibility for learning about the Earth, our solar system, the universe, and their interrelationships.

Awards: Standard Grants

Proposal Deadline: August 03, 2018

Contact: Terrance Onsager

National Endowment of Humanities

Grant Program: Infrastructure and Capacity Building Challenge Grants

Agency: National Endowment of Humanities

Website: <https://www.neh.gov/grants/preservation/infrastructure-and-capacity-building-challenge-grants>

Brief Description: The mission of this Challenge Grants program is to strengthen the institutional base of the humanities by enabling infrastructure development and capacity building. Awards aim to help institutions secure long-term support for their core activities and expand efforts to preserve and create access to outstanding humanities materials. Applications are welcome from colleges and universities, museums, public libraries, research institutions, historical societies and historic sites, scholarly associations, state humanities councils, and other public and nonprofit humanities entities. Programs that involve collaboration among multiple institutions are eligible as well, but one institution must serve as the lead agent and formal applicant of record.

Through these awards organizations can increase their humanities capacity with funds invested in a restricted, short-term endowment or other investment fund (or spend-down funds) that generate expendable earnings to support and enhance ongoing program activities. Eligible activities include the documentation of cultural heritage materials that are lost or imperiled; the preservation and conservation of humanities materials; and the sustaining of digital scholarly infrastructure.

Challenge grants may also support the purchase of equipment and software; the design, purchase, construction, restoration, or renovation of facilities needed for humanities activities; and collections sharing. Such expenditures bring long-term benefits to the institution and to the humanities more broadly.

Award: Up to \$750,000

Proposal Deadline: August 09, 2018

Contact: Contact NEH's Division of Preservation and Access at 202-606-8309 or challenge@neh.gov.

Phrma Foundation

Grant Program: Informatics

Agency: Phrma Foundation

Website: <http://www.phrmafoundation.org/2018-awards/pre-doctoral-fellowship-awards/informatics/>

Brief Description: This award supports students in advanced stages of training and thesis research.

The goal of the Informatics awards program is to promote development and use of novel informatics in an integrative approach toward understanding normal processes of human biology and disease processes. Informatics awards support career development of scientists engaged in research that significantly integrates state-of-the-art information technology developed with advanced biological, chemical, and pharmacological sciences in the following areas:

- Genetics Proteomics
- Molecular Systems Biology
- Medical (human) Pathways and Networks
- Pharmaco- Integrative Biology
- Population Modeling and Simulation
- Novel approaches to the analysis of Big Data

Genomics Molecular Epidemiology

- Functional

- Structural
- Toxicology-
- Pharmacology-
- Comparative

Eligibility: This program supports full-time, in-residence students who will have completed most of their pre-thesis requirements (at least two years of study) and be engaged in thesis research as PhD candidates by the time the award is activated. Due to the high demand for this fellowship, the PhRMA Foundation will accept only two applications per academic institution. All applicants must be U.S. citizens or permanent residents.

Awards: \$20,000 per year, up to two years.

Proposal Deadline: September 1, 2018 @ 11:59 PM EDT

Contact: Please let Eric Blitz (eric.blitz@njit.edu) and Atam Dhawan (dhawan@njit.edu) know if you are interested in applying.

Samsung

Grant Program: The Global Research Outreach (GRO) Program

Agency: Samsung

Website: <https://www.sra.samsung.com/partnerships/university/>

Brief Description: Theme: EXPLAINABLE DEEP LEARNING MODELS - Sub Theme: Explainable Models in Multi-modal Applications The task of explaining Deep Learning (DL) models has gained a lot of interest from the research community in recent times. In this GRO, we propose studying explainability of DL models, specifically via two problems: (a) Explainable Multi-modal Visual Dialog: There are many scenarios in mobile phone or desktop usage where a user inspects an image (e.g., a picture shared on the phone or an image obtained while browsing the web) and asking questions about it (e.g., where was this picture taken) – this is the problem of Visual Question Answering (VQA). The user may also ask for explanations for the answers generated in VQA (e.g., why you think so) – this is the task of Explainable Question Answering (XQA). However, while using a conversational assistant like Samsung Bixby, the user may be involved in a multi-modal dialog with the assistant, using text input, speech, etc. Those additional user input may contain rich context information for the assistant to understand and digest. As the assistant interacts with the user in a conversation across multiple modalities, the user may ask for explanations at different stages -- we call this the problem of Explainable Multi-modal Visual Dialog. (b) Explainable Recommendations: The Bixby assistant often makes shopping suggestions or other purchase recommendations to the user (e.g., based on an image that is taken from the camera album, based on a spoken purchase request made by the user, etc.). One of the research goals in such a recommendation system could be explaining the underlying reason of the recommendations made during immersive interactive experiences (e.g., when shopping for items online using Bixby vision, using the point-and-shoot camera).

Theme: Beyond 5G Communication Systems - Sub Theme: Components for Terahertz Communication Systems Terahertz (THz) frequency band, 0.1 to 10 THz, offers vast spectrum resources to support >100Gbps for beyond 5G communication systems. FCC is currently considering to open the 95 - 475 GHz range for commercial use. Key component challenges for THz communication are low noise/high gain amplification, high linearity transmit power generation, low noise oscillators, and THz frequency conversion. Short wavelengths (3mm @ 100GHz) THz present challenges in conventional antenna element fabrication, while on-chip antennas traditionally exhibit reduced efficiency. Additional challenges arise from increased path loss and the resulting increase in antennas required for sufficient link margin. The latter offers opportunities in spatial spectrum reuse by taking advantage of the resulting pencil-beam transmissions.

Awards: Financial sponsorship for one year, in amounts up to \$120,000

Contact: Please let Eric Blitz (eric.blitz@njit.edu) and Atam Dhawan (dhawan@njit.edu) know if you are interested in applying.

Simons Foundation

Grant Program: Simons Investigator program in the Mathematical Modeling of Living Systems (MMLS)

Simons Foundation Fellowships in Math and Theoretical Physics

Agency: Simons Foundation

Website: <https://www.simonsfoundation.org/mathematics-physical-sciences/simons-investigators/simons-investigator-program-nominations/>

<https://www.simonsfoundation.org/grant/simons-fellows-in-theoretical-physics/?tab=rfa> -- Simons Fellows in Theoretical Physics.

<https://www.simonsfoundation.org/grant/simons-fellows-in-mathematics/?tab=rfa> --- Simons Fellows in Mathematics

Brief Description: The Simons Foundation invites nominations for Simons Investigators in the Mathematical Modeling of Living Systems (MMLS), a joint program of the Mathematics and Physical Sciences and Life Sciences divisions of the Simons Foundation. Investigators in MMLS are outstanding scientists, often with mathematics or theoretical physics backgrounds, now engaged in research based on mathematical modeling in the life sciences.

New approaches in mathematically based modeling are making increasingly important contributions to the life sciences. The MMLS program aims to support theoretical approaches making important contributions to the life sciences and, thus, to foster a scientific culture of theory-experiment collaborations similar to that prevailing in physics. To encourage researchers to pursue this endeavor, the MMLS program will provide a long-term, stable base of support, enabling a focus on model based approaches to important issues in the life sciences. A broad spectrum of research areas within the life sciences will be considered, ranging from cellular-level issues of organization, regulation, signaling and morphogenic dynamics to the properties of organisms and ecology, as well as neuroscience and evolution; however, preference will be given to areas in which modeling approaches are less established and, for this reason, bioinformatics- and genomics-related proposals fall outside the scope of the program. In all cases, preference will be given to work developing deep theoretical ideas relevant to experiments, suggesting new questions and new classes of experiments, introducing important, new concepts, and explaining data.

Theory must connect with experiment, and candidates should articulate their own views about the nature of this connection, rather than accepting conventional wisdom; theory is more than data analysis. The program explicitly does not support translational or specifically human disease-related research.

Eligibility: To be eligible to be nominated for an Investigator in MMLS award, a scientist must be engaged in research related to the MMLS program and must not previously have been a Simons Investigator. He/she must have a primary appointment as a faculty member (tenured or non-tenured) at an educational institution in the United States, Canada, the United Kingdom or Ireland, on a campus within these countries, and the primary department affiliation must have a Ph.D. program. At the time of the appointment start date, an Investigator should be in the early stages of an academic career and must be within ten years of the start of his/her first faculty position.

Award: A Simons Investigator in MMLS is appointed for a period of five years for up to \$132,000 per year. Appointments will begin August 1, 2019. An Investigator will receive research support in the amount of \$100,000 per year. An additional \$10,000 per year will be provided to the Investigator's department. The Investigator's institution will receive an additional 20 percent per year in indirect costs.

Proposal Deadline: The deadline to submit nominations is October 31, 2018, at 11:59:59 p.m. EST.

University Nomination Process and Contact: If interested, please send an email to Eric Blitz (eric.blitz@njit.edu) and Atam Dhawan (dhawan@njit.edu) and copy to college dean to discuss the nomination before August 1, 2018.

Grant Program: Simons Foundation Fellowships in Math and Theoretical Physics

Agency: Simons Foundation

Website:

<https://www.simonsfoundation.org/grant/simons-fellows-in-theoretical-physics/?tab=rfa> -- Simons Fellows in Theoretical Physics.

<https://www.simonsfoundation.org/grant/simons-fellows-in-mathematics/?tab=rfa> --- Simons Fellows in Mathematics

Brief Description: The Simons Foundation's Mathematics and Physical Sciences (MPS) division invites applications for the Simons Fellows in Theoretical Physics program, which is intended to make sabbatical leaves more productive by extending them to a full academic year. The MPS division's scientific advisory board will advise the foundation on the selection of awardees. Awards will be based on the applicant's scientific accomplishments in the five-year period preceding the application and on the potential scientific impact of the work to be done during the leave period.

Eligibility Requirements: A Simons Fellow in Theoretical Physics must have a teaching or administrative tenured position at the same U.S. or Canadian college or university within the physics or related department at the time of application, throughout the course of the sabbatical and in the term following the leave. This must be the applicant's primary position. In addition, a Fellow must have an active current research program. Fellows cannot simultaneously hold a Simons Investigator award.

Award: A Simons Fellowship in Theoretical Physics/Mathematics provides salary replacement for up to 50 percent (up to a maximum of \$100,000) of the Fellow's current academic-year salary, whether normally paid over 9 or 12 months, and up to \$25,000 for expenses related to the leave. The Fellow's home institution will receive *an additional* 20 percent overhead on allowable expenses. Please note that the foundation's indirect cost policy allows up to 20 percent of direct cost expenditures. Any unspent funds at the end of the award must be returned to the Simons Foundation.

Proposal Deadline: September 27, 2018

University Nomination Process and Contact: If interested, please send an email to Eric Blitz (eric.blitz@njit.edu) and Atam Dhawan (dhawan@njit.edu) and copy to college dean to discuss the nomination before August 1, 2018.

Graham Foundation

Grant Program: Architecture and Design Projects

Agency: Graham Foundation

Website: http://www.grahamfoundation.org/grant_programs?mode=individual

Brief Description: For individuals, our priorities are to:

- Provide opportunities to create, develop, and communicate a project about architecture and the designed environment that will contribute to their creative, intellectual, and professional growth at crucial or potentially transformative stages in their careers.
- Support their efforts to take positions, develop new forms of expression, and engage debate.
- Help them communicate their work in the public realm and reach new and wider audiences.
- Support new voices by giving priority to first-time applicants.

Overall we are most interested in opportunities which enable us to provide critical support at key points in the development of a project or career.

Award: 1) *Production/Presentation Grants*: Grants of up to \$20,000 will be awarded to assist individuals with production-related expenses that are necessary to take a project from conceptualization to realization and public presentation. Projects may include but are not limited to publications, exhibitions, installations, films, and new media projects.

2) *Research/Development Grants*: Grants of up to \$10,000 will be awarded to assist individuals with seed money for research-related expenses such as travel, documentation, materials, supplies, and other development costs.

Proposal Deadline: September 15, 2018

University Nomination Process and Contact: If interested, please send an email to Eric Blitz (eric.blitz@njit.edu) and Atam Dhawan (dhawan@njit.edu).

Burroughs Wellcome Fund

Grant Program: Career Awards at the Scientific Interface

Agency: Burroughs Wellcome Fund

Website: <https://www.bwfund.org/grant-programs/interfaces-science/career-awards-scientific-interface>

Brief Description: These grants are intended to foster the early career development of researchers who have transitioned or are transitioning from undergraduate and/or graduate work in the physical/mathematical/computational sciences or engineering into postdoctoral work in the biological sciences, and who are dedicated to pursuing a career in academic research.

Scientific advances such as genomics, quantitative structural biology, imaging techniques, and modeling of complex systems have created opportunities for exciting research careers at the interface between the physical/computational sciences and the biological sciences. Tackling key problems in biology will require scientists trained in areas such as chemistry, physics, applied mathematics, computer science, and engineering.

Award: Burroughs Wellcome Foundation Career Awards at the Scientific Interface (CASI) provide \$500,000 over five years to bridge advanced postdoctoral training and the first three years of faculty service. These awards are open to U.S. and Canadian citizens, permanent residents, and temporary residents. These grants are intended to foster the early career development of researchers who have transitioned or are transitioning from undergraduate and/or graduate work in the physical/mathematical/computational sciences or engineering into postdoctoral work in the biological sciences, and who are dedicated to pursuing a career in academic research.

Proposal Deadline: September 5, 2018

University Nomination Process and Contact: If interested, please send an email to Eric Blitz (eric.blitz@njit.edu) and Atam Dhawan (dhawan@njit.edu).

Merck KGaA

Grant Program: Merck Research Grants

Agency: Merck

Website: <https://www.emdgroup.com/en/research/open-innovation/350anniversaryactivities/researchgrants.html>

Brief Description: In celebrating its 350th anniversary, Merck KGaA, Darmstadt, Germany offers a series of research grants to stimulate innovative research in challenging areas of future importance. Merck KGaA, Darmstadt, Germany intends to provide several research grants of up to **EUR 350,000 per year for 3 years** in various research areas with the option of extension or expansion.

Research Areas:

<https://www.emdgroup.com/en/research/open-innovation/350anniversaryactivities/researchgrants/healthylives.html>

Challenge 1: What is the next game-changing molecule or technology to help cure cancer or autoimmune disease or to improve drug discovery in general?

<https://www.emdgroup.com/en/research/open-innovation/350anniversaryactivities/researchgrants/materialssolutions.html> - Materials and Solutions

Challenge 1: Can you develop a new generation of intelligent materials?

<https://www.emdgroup.com/en/research/open-innovation/350anniversaryactivities/researchgrants/vibrantdigital.html> -- Digitalization /Computing

Award: 1) *Production/Presentation Grants*: Grants of up to \$20,000 will be awarded to assist individuals with production-related expenses that are necessary to take a project from conceptualization to realization and public presentation. Projects may include but are not limited to publications, exhibitions, installations, films, and new media projects.

2) *Research/Development Grants*: Grants of up to \$10,000 will be awarded to assist individuals with seed money for research-related expenses such as travel, documentation, materials, supplies, and other development costs.

Proposal Deadline: August 15, 2018

University Nomination Process and Contact: If interested, please send an email to Eric Blitz (eric.blitz@njit.edu) and Atam Dhawan (dhawan@njit.edu).

Streamlyne Question of the Week

Question: How do I search for a document in Streamlyne?

Answer: Streamlyne Research search features are accessible from the Menu Bar, from the Main Menu, and from within documents. (Page 19 of the New User Manual posted on the Research website <http://www.njit.edu/research/sites/research/files/StreamlyneNewUserManualCommonElements.pdf>).

Searching Across All Modules: In any Streamlyne Research module, please click the magnifying glass on the Menu Bar to access the Document Lookup. This will open up a form to search for any document in any Streamlyne Research module, regardless of whether the document is delivered or customized.

Searching Within a Module: If you would like to search for a document specific to a given module, click the hyperlinked menu option from the Main Menu. Streamlyne Research will direct you to a Lookup form that searches specifically for documents within the module selected.

Searching at the Field Level: Whether you are looking for a data element within a document section or trying to narrow down search criteria, you may search for a specific value by clicking the magnifying glass next to any field. If a magnifying glass does not appear next to a field, it means that the entries for this field are not limited to a set of configured values, and therefore cannot be accessed using the Lookup function.

More FAQs on Streamlyne: Please visit <http://www.njit.edu/research/streamlyne/>

Streamlyne Information

Streamlyne User Manuals: <http://www.njit.edu/research/streamlyne/>

Streamlyne_NewUserManual_CommonElements.docx : This manual provides a reference to all the common elements of Streamlyne Research. This user manual is a good document to review each module's functionality.

Streamlyne_NewUserManual_PD&PDBudget.docx: This is a user manual on proposal and budget development in Streamlyne. The content herein explain the use and functionality of this module. This is the most useful Streamlyne document for PIs and users new to Streamlyne.

How-to-do-Videos

New "How to Do" videos have been posted on the research website <http://www5.njit.edu/research/streamlyne/>. The videos show step-by-step process on the following tasks:

- ◆ [How to Begin Proposal Submission in Streamlyne](#)
- ◆ [How to Input Proposal Budget](#)
- ◆ [How to Process Approvals](#)
- ◆ [How to Upload Proposal Attachments](#)
- ◆ [How to Search for a Proposal that is in Route](#)
- ◆ [Difference Between "Prime Sponsor Code" and "Sponsor Code"](#)
- ◆ [How to Select an RR Budget, RR Sub-award or Modular Budget](#)
- ◆ [How to Add a Student/Summary](#)
- ◆ [Participant Support Categories](#)
- ◆ [Supplies Specific Category Materials](#)
- ◆ [How to Create a Modular Budget](#)

Faculty and staff having any questions on proposal submission, may contact their college representatives, and also follow up with **Justin Samolewicz, Associate Director (Pre Award)** 973-596-3145; justin.m.samolewicz@njit.edu; and **Eric Hetherington, Director, Sponsored Research Programs Administration** 973-596-3631; eric.d.hetherington@njit.edu. The college representatives to help PIs on proposal submissions are

John McCarthy, NCE Director of Research; (973) 596-3247; john.p.mccarthy@njit.edu

Cristo Leon, CSLA Director of Research; (973) 596-6426; cristo.e.yanezleon@njit.edu

Sean Andrews, YWCC Director of Research; (973) 596-5352; sean.t.andrews@njit.edu

Iris Pantoja, NCE, CoAD and MTSM Project Manager; 973-596-4483; irp3@njit.edu

Need Information about Funding?

Finding Research Opportunities and Collaborations (FROC)

Walk-In Open-Hour Discussion with SVPR Over Tea

Every Thursday: 3.00 PM-4.00 PM; 340 Fenster Hall

The Office of Research has started a new service to help all faculty and staff explore collaborative research opportunities and currently active RFPs (Request for Proposals) for potential proposal development and submission. Faculty and research staff members are welcome to meet with Senior Vice Provost for

Research Atam Dhawan at the open-hour every Thursday from 3.00 PM to 4.00 PM to discuss research opportunities related issues including the following but not limited to:

- Research opportunities and potential collaborations
- Currently active RFPs and developing collaborative teams for proposal submission
- Proposal review criterion for specific RFP/program/agency
- Proposal concept and draft review in the context of review criterion
- Future plans for proposal development and submission
- Invention disclosures, patent applications and processing of intellectual property
- External faculty research awards including fellowships

Though *walk-ins* are welcome during the open-hour, faculty members are encouraged to email SVPR Atam Dhawan (dhawan@njit.edu) about specific questions on research opportunities and needs to be discussed in advance for more detailed discussion.

The open-hour session with individuals or small groups of faculty and research staff members is expected to focus on finding research opportunities, developing collaborative teams, exploring the review criterion and reviewing program requirements. Specific proposal submission and grant management issues can be discussed with Office of Research staff separately.

Enjoy coffee/tea and cookies with SVPR over the discussion.

For any questions and additional information, please send an email to SVPR at dhawan@njit.edu.
