Why

FOOD WASTE

Should Matter to You...

- Increased Methane Emissions
- High Economic Costs
- Valuable Resources and Energy Wasted

CH. is a greenhouse gas (about 30x more powerful than CO₂). Increased emissions amplify the effects of global warming.

4% of Energy, 20% of Land, and 25% of Water are used to make food that is wasted.

Approximately one trillion dollars lost per year due to food waste.

Please help us reduce food waste by filling out this quick survey!
