

NJIT SALARY REPORT OF MAY 2018 GRADUATES

While the national average starting salary for all U. S. college graduates declined by 2% this year to \$50,516, NJIT graduates received a raise even before their first day of work. The average starting salary for all reporting 2018 NJIT BS/BA graduates is \$63,741 an increase of 5.4% from last year's class and 26% higher than the national average.

The highest paid NJIT undergraduate majors this year are degree recipients in Human Computer Interaction (\$81,000)

and Computer Science (\$73,742). Chemical Engineering, Computer Engineering, and Computer Technology majors all earned starting salaries of just under \$70,000 per year. NJIT master's degree recipients also fared extremely well with the average starting salaries for 10 different majors exceeding \$70,000 and four different majors whose graduates all exceeded \$83,000 per year.
