“EPA Brownfield All Grantee Meeting”

NJIT TAB partnered with EPA Region 3 and Region 4, to bring together EPA brownfield grantees from PA, VA, WV, TN, NC, and KY to build synergies and partnerships across state and regional lines and to give guidance to the grantees wherever they are in the process. Approximately 40 grantees and their contractors participated in the session.

The event provided a platform for attendees to forge partnerships and encourage closer collaboration for brownfield redevelopment. During the facilitated peer-to-peer discussion, the attendees brought forth numerous ideas and solutions regarding how to get started with a grant, how to work with contractors, and how to work with property owners.

The NJIT TAB Team developed a list of questions for the panelists, assisted in identifying speakers, and provided facilitation services for the event.

The event sparked many great discussions, and included a structured networking session to foster peer-to-peer relationships for grantees.
