All Grantees Meeting at the 2018 Pennsylvania Brownfield Conference

NJIT TAB partnered with EPA Region 3 for an EPA Brownfield Pennsylvania Grantee's Meeting. This was held as a pre-conference session at the 2018 Pennsylvania Brownfields Conference in Bethlehem, Pennsylvania on October 1, 2018.

The event provided a platform for attendees to forge partnerships and encourage closer collaboration for brownfield redevelopment.

NJIT TAB developed a list of questions for the panelists, and provided facilitation services for the event. The event sparked many great discussions, and included a structured networking session to foster peer-to-peer relationships for grantees.

During the facilitated peer-to-peer discussion, the attendees brought forth numerous ideas and solutions regarding how to get started with a grant, how to work with contractors, and how to work with property owners. Grantees discussed their successful strategies for updating inventories and identifying priority sites, to creating and maintaining Brownfield Steering Committees and Task Forces, to developing resources for promoting

redevelopment (fact sheets, websites, videos of success).

The attendees stated that the session was quite valuable and that they look forward to developing a stronger partnership with their peers.
