New Grantees Meeting at the 2018 West Virginia Brownfield Conference

NJIT TAB partnered with EPA Region 3, the West Virginia Brownfields Assistance Center, and the West Virginia Department of Environmental Protection (WVDEP) for the EPA New Grantee Meeting. This was held at the 2018 West Virginia Brownfields Conference in Charleston on September 5, 2018.

Five grantees and their contractors participated in the session. The grantees came from the West Virginia and Virginia areas.

The event provided a platform for attendees to forge partnerships and encourage closer collaboration for brownfield redevelopment.

During the facilitated peer-to-peer discussion, the attendees brought forth numerous ideas and solutions regarding how to get started with a grant, how to work with contractors, and how to work with property owners.

NJIT TAB gave a presentation on the TAB Program stressing the various ways new grantees can utilize TAB services.

Additional topics discussed during the meeting included cooperative agreements, procedures for reporting, procurement of consultants, and community involvement.
