

“Brownfields 101” Workshops **Connecticut, Pennsylvania, Maryland & Virginia**

NJIT TAB Brownfields 101 Workshops can be tailored to each specific audience. Typically these sessions include a discussion of the history of industrialization and how that has led to brownfields; the definition of brownfields; a brief overview of the brownfield assessment, remediation and redevelopment processes; and examples of brownfields that have been successfully redeveloped.

Brownfield 101 Workshops are designed to build a community’s capacity to compete for brownfields funding, identify possible brownfields

opportunities, and to develop a visioning of what sustainable revitalization can be.

NJIT TAB Brownfields 101 Workshops increase community knowledge of specific issues, challenges, and opportunities relating to the reclamation and reuse of brownfield sites. NJIT TAB Brownfields 101 Workshops empower communities with the tools required to assess, cleanup, and redevelop brownfield sites.

NJIT TAB has conducted Brownfield 101 Workshops in: Torrington, CT; Philadelphia, PA; Richmond, VA; and Norfolk, VA.
