## NJIT TAB Provides Much Needed Resources to Fitzwilliam, NH

At the request of the Town of Fitzwilliam, New Hampshire, NJIT TAB conducted a Brownfields Basics Workshop on October 7, 2019 in Fitzwilliam at the Fitzwilliam Town Hall. NJIT TAB designed the workshop in response to Fitzwilliam's needs and conducted it along side EPA Region 1, New

Hampshire Department of Environmental Services, and the Southwest Region Planning Commission. NJIT TAB served as an expert speaker on navigating the brownfield redevelopment process and dispelling persistent brownfield myths that inhibit forward movement on projects. NJIT TAB also presented TAB's services and resources available to rural communities in need of technical assistance with their brownfield properties, as well as case studies of communities using TAB assistance in the New England area.

The goal of the event was to serve as an educational forum for the citizens of Fitzwilliam to understand the brownfield process and be updated on the status of the Meadowood brownfield site. Other topics discussed at the event included:

- EPA Brownfield Funding Sources
- NHDES Voluntary Cleanup Program
- NH Brownfield Liability Issues
- NH Brownfield Success Stories

Approximately, 20 people attended. The audience primarily consisted of concerned citizens and town selectmen.
