NJIT TAB speaks at Virginia Solar Summit

NJIT TAB was a featured speaker at the 2021 Virginia Solar Summit hosted by Virginia Department of Environmental Quality, Virginia Department of Mines Minerals & Energy, West Virginia Brownfield Assistance Center, and Appalachian Voices on March 16, 2021.

The 2021 Virginia Solar Summit was a free 3-day virtual event (March 16-18) consisting of deep policy dives, technical and technological presentations, and detailed discussions of how to access state and federal grants.

In addition, resources and information about methods for advancing ground-up solar power production projects on greenfield and brownfield sites were discussed.

NJIT TAB served as a speaker for the event in a session titled “National Solar Experts Exchange: Public Programs & Professional Assistance”.

In the session, NJIT TAB spoke about TAB resources and services and how communities interested in solar development on brownfield sites could partner with TAB.

Approximately 825 participants joined the meeting. The audience consisted of solar developers, federal, state, and municipal officials, and environmental consultants.
