NJIT TAB Participates in Region 2's Brownfields Basics Workshop in Puerto Rico

EPA Region 2 conducted a Brownfields Basics Get Ready Workshop for all interested parties in Puerto Rico as a part of its annual "Caribbean Week" outreach efforts. NJIT TAB participated by presenting an overview of the assistance available to eligible entities via the TAB program as well as how to request assistance.

Given the high attendance, NJIT TAB was also able to engage in numerous one-on-one discussions with participants regarding their brownfield challenges. This served as the jumping off point for communities to receive TAB's services.

The workshop was held May 17th and attended by approximately 20 persons representing territory entities, non-profits and private citizens.
