Intermediate Interviewing Techniques & Strategies for Higher Education

Training and Certification Course
WELCOME!

- Please log in to your ATIXA Event Lobby each day to access the training slides, supplemental materials, and to log your attendance.

- The ATIXA Event Lobby can be accessed by the QR code or visiting [www.atixa.org/atixa-event-lobby](http://www.atixa.org/atixa-event-lobby) in your Internet browser.

- Links for any applicable training evaluations and learning assessments are also provided in the ATIXA Event Lobby. You will be asked to enter your registration email to access the Event Lobby.

- If you have not registered for this training, an event will not show on your Lobby. Please email events@atixa.org or engage the ATIXA website chat app to inquire ASAP.
Any advice or opinion provided during this training, either privately or to the entire group, is never to be construed as legal advice or an assurance of compliance. Always consult with your legal counsel to ensure you are receiving advice that considers existing case law in your jurisdiction, any applicable state or local laws, and evolving federal guidance.
Content Advisory

The content and discussion in this course will necessarily engage with sex- and gender-based harassment, discrimination, violence, and associated sensitive topics that can evoke strong emotional responses.

ATIXA faculty members may offer examples that emulate the language and vocabulary that Title IX practitioners may encounter in their roles including slang, profanity, and other graphic or offensive language. It is not used gratuitously, and no offense is intended.
Course Introduction

This course focuses on the best available research and field-tested practices for effective investigations.

Practitioners will learn how to conduct a cognitive interview and apply sophisticated investigation skills to an array of Title IX complaints.

Our goal is to provide you with an opportunity to practice and refine your investigative skills to increase proficiency and confidence.
The 2024 Title IX Regulations are subject to legal challenges across the country

- Generally, the recent lawsuits are targeting the gender identity provisions and the hostile environment definition

Opponents of the Regulations are seeking *injunctions* to delay or halt implementation of all or some of the Regulations

- **Injunction**: A court order requiring an individual or entity to either perform or stop performing a specific action

Types of injunctions:

- **Complete injunction**: prohibits the Department of Education (ED) from enforcing the 2024 Regulations in its entirety
- **Partial injunction**: prohibits ED from enforcing specified provisions of the 2024 Regulations
2024 Title IX Regulations Litigation

- If a court orders an injunction, that decision may be appealed to a higher court
  - Otherwise, the injunction stays in effect until a trial occurs
- ATIXA anticipates that any injunction decision will be appealed
- If the 2024 Regulations are not enforceable in some or all states as a result of injunctions, schools, districts, and institutions in those states will continue to follow the **2020 Regulations**

**Note:** Some states also have “Do Not Implement” directives from state officials
- Independent from any federal lawsuits or injunctions
- Implementation will be unsettled for the foreseeable future
  - Consult legal counsel to determine implementation plans
- Track developments on ATIXA’s Regulations website
# Title IX Resolution Process Overview

## 1. Incident
- Report, Complaint, or Notice to Title IX Coordinator (TIXC)

## 2. Initial Evaluation
- Jurisdiction
- Dismissal
- Supportive Measures
- Emergency Removal
- Referral to Another Process
- Informal/Formal Resolution

## 3. Investigation
- Notice of Investigation and Allegation(s) (NOIA)
- Interviews
- Evidence Collection
- Parties’ Evidence Review/Response
- Optional Written Report

## 4. Determination
- Questioning
- Credibility Assessment
- Determination and Rationale
- Sanctions
- Remedies
- Option for Live Hearing
- Outcome Notice

## 5. Appeal
- Appeal Grounds
- Determination and Rationale
Investigation Steps

10 Steps of Investigations:
1. Receive Notice/Complaint
2. Initial Evaluation and Jurisdiction Determination
3. Determine Basis for Investigation
4. Notice of Investigation and Allegation(s)
5. Establish Investigation Strategy
6. Adequate, Reliable, and Impartial Investigation
7. Summary of Relevant Evidence/Investigation Report
8. TIXC Reviews Evidence
10. Final Investigation Report
Building Rapport
Building Rapport

- Rapport is meant to create a level of transparency and trust
  - Reinforce neutrality and impartiality with authenticity
  - Set the tone for the interview
  - Establish expectations

- Rapport building occurs throughout the interview, not just in the first five minutes
  - Ongoing effort to build and maintain rapport

- Do not sacrifice professionalism or neutrality to build rapport
Ethical Considerations

- Professional vs. Buddy-Buddy
- Understanding vs. Agreeing
- Neutrality vs. Empathy
- Equity vs. Advocacy
Practical Considerations

- Attire
- Location
- Notetaking
- Recording
- Response to Emotions
- Duration
- Breaks
- Entry/Exit
The Introductory Spiel

**Explain:**
- Process and interview flow
- Investigator role
- Expectations
- Retaliation and amnesty
- Interviewee rights
- Advisor role
- Privacy/confidentiality and their limits
- Need for truthfulness
The Introductory Spiel

- Answer questions
  - Anticipate reluctance or fear
- Provide option to take breaks
- Answer their questions about the interview or process
- Encourage interviewee to refrain from filtering language
- Avoid playing “cat and mouse” with the complaint contents or allegation details
Difficult Interviewees

- Interview in Investigator pairs
- Mirror responses
- Review facts
- Highlight conflicts
- Emphasize contradictory statements
- Accept any information they will share
- Ask logical follow-up questions
- Clarify vague, nonsensical, or non-responsive answers
Activity: Interview Video
Anatomy of a Bad Interview
Cognitive Interviewing
Non-Cognitive Interviews

- Interviewer briefly establishes rapport
- Open-ended questions
  - Narrative answers
- Direct questions focusing on details
- Neutral delivery
- Limited effort to promote memory recall
- Linear questions tracking anticipated timeline of events
- Occasionally solicit a written narrative before the interview
Outcomes to Avoid

Non-cognitive interviews tend to disrupt the natural process of memory searching, leading interviewees to:

- Withhold information
- Fail to volunteer unsolicited information
- Abbreviate answers
- Provide inaccurate answers
Cognitive Interviewing

- Based on principles of memory and communication
  - Increases the quality and amount of relevant information an interviewer can gather
  - Decreases the likelihood of an interviewee recalling an event incorrectly
- Rapport is highly valued
  - Increases willingness of interviewee to share
  - Decreases:
    - Anxiety about discussing sensitive subjects
    - Sense of feeling judged
    - Defense mechanisms
Cognitive Interview Considerations

- Cognitive interviewing requires the interviewer to bring the interviewee back to the scene
  - Raises concerns of re-traumatization
  - Prepare the interviewee for the possibility
- Interviews will likely take more time
- Investigators may want to explain the interview approach
  - Transparency is a rapport-building tactic
- If using co-Investigators, do not switch questioners during the recall process
  - Switching could break focus and disrupt recall
Cognitive Interview Structure

**INTRODUCTION**
- Rapport development
- Information sharing
- Communication expectations
- Context

**TRANSFER CONTROL**
- Interviewee directs the interview
- Active participant

**PROBE**
- Identify central issues
- Explore detail
- Funnel
- Corroborate

**RECALL**
- Facilitate recall
- Verbal and non-verbal expressions
- Sensory exploration
- Extensive detail

© 2024 Association of Title IX Administrators
Sensory Recall

Prompt recall through sensory experience, rather than event narrative

- “Are there specific scents or smells you remember?”
- “Are there specific sounds that you recall?”
- “How did the drink taste to you?”
- “How did it feel as you sat down on the couch?”
- “What else do you remember seeing from your spot on the couch?”
Memory Jogging Techniques

Prompt recall through accessing memories with divergent, rather than direct, retrieval methods

- Recount the events from the perspective of an imaginary third-party viewing the scene
- Take the witness to the scene to jog recall, but beware of trauma triggers
- Have the witness give a factual account without editorializing, then transcribe the account and ask the witness to go back and add their opinions and perceptions
Additional Tactics and Tools

- Reverse Chronological Order
- Model Statements
- Unexpected Questions
- Written Narrative
- Draw/Use a Picture
- Third-Party Point of View
Focus on Specifics

Review details to:
- Spur additional recall
- Check for accuracy and consistency
- Correct errors or omissions
- Clarify contradictions or ambiguities
  - Terms
  - Phrases
- Rephrase confusing questions
Funnel Technique

- Open-Ended: Invite a narrative response
  - Explore details, motivations, and intentions

- Probing
  - Establish and re-establish testimony
  - Test with repetition
  - Explore disputed testimony

- Closed
Interview Closure

- Ask the interviewee to contact the Investigator with any new information
  - Extends the interview
  - May result in more or better detail
- Ask interviewee to suggest other individuals for the Investigator to interview
  - Or suggest questions to ask others
Activity: Cognitive Interviewing
## Cognitive Interviewing Activity

### Step 1
- **Interviewee:** Review your prompt in the lobby
- **Interviewer:** Review your prompt in the lobby

### Step 2
- **Both:** Do not share details from your respective prompts
- **Interviewer:** Conduct interview and take notes

### Step 3:
- **Interviewee:** What did the interviewer do that helped, hindered, or distracted you?
- **Interviewer:** What approaches did you use? Were they effective?
Cognitive Interviewing Activity, Part 2

- Using the statement from below, what kinds of questions would you use to solicit more information from the Complainant during their interview?

I cannot remember much from the party. I remember walking into the duplex with a couple friends. It smelled weird when we walked in the door, and it was dark.

I think I stayed with one of my friends that I met at the party, and we got a drink and hung out in a corner of the room. I do not recall who was present.

At some point, Respondent came over to talk and my friend left me alone. I had been sitting for a while and when Respondent took my hand and helped me stand up, I felt dizzy. I couldn’t really say anything else.
Memory
Memory Basics

**Sensory**
- Lasts a few seconds
- If brain does not attach meaning, information is lost

**Short-Term**
- Lasts up to 30 seconds
- Ex: Phone number

**Long-Term**
- Stored away
- Meaningful connection to information
Memory, Perception, and Accuracy

- Long-term storage is strengthened through association
  - Accessing memory means traversing association pathways
- Memory is not like a carbon copy of a file or a video
  - Memory is filtered through:
    – Prior experiences
    – Beliefs
    – Education
    – Perspective
- The result is a mix of factual recollection and filtered perception
  – May alter facts; memory can vary with each retrieval
Memory and Recall

- Repeated recollection attempts can strengthen recall and improve accuracy
  - Neural access pathways can literally thicken
  - Strategies encouraging holistic memory retrieval yields more accurate information
    - Questions focused on episodic memory or isolated critical moments are less reliable
- Focus on broader recall, even innocuous details
  - Repetition can help
- Use open-ended questions, delay funnel questioning if needed
- Tie critical details to nonessential details for continuity
- Provide adequate space and time for recall to occur
- Silence can be useful; don’t rush to fill it
Trauma Review

- **Trauma** is exposure to an event or events that create a real or perceived threat to life, safety, sense of well-being, or bodily integrity
  - Acute, chronic, or complex
  - Neurological, biological, psychological, social, and emotional impacts
  - Developmental, intergenerational, historical, secondary, vicarious, or collective
  - Responses to trauma can vary, depending on a variety of factors
- Trauma-infused practices serve to better communicate and interview
Memory and Trauma

- Trauma may cause the brain to block access to memory
  - Traumatic memories are stored, but access may be hindered
- Trauma-informed interviewing techniques lower the brain’s defensive measures
  - In a safe environment, the brain is more willing to access and experience traumatic memories
- Don’t assume trauma is the cause of memory issues
Memory and Trauma

- Traumatic memories are highly filtered
  - Self-blaming
  - Normalization
  - Lack of recall
  - Denial

- Trauma can impact Complainants, Respondents, and witnesses
  - Different forms and manifestations

- Being trauma-informed as an interviewer can help to draw greater detail from an interviewee, but trauma should never be allowed to excuse the absence of evidence
Credibility
Credibility Review
Credibility Review

- Credibility assessments weigh the accuracy and reliability of relevant information
  - Not synonymous with “truthful”
  - Evasion, misleading testimony, or memory errors may impact credibility
- Primary consideration is *corroboration*
  - Source + content + plausibility
- Avoid too much focus on *irrelevant* inconsistencies
  - However, consistency of testimony can enhance credibility, especially when other sources of evidence corroborate that consistency
Credibility Factors

**Corroboration**
- Aligned testimony and/or physical evidence

**Inherent Plausibility**
- “Does this make sense?”
- Be careful of bias influencing sense of “logical”

**Motive to Falsify**
- Do they have a reason to lie?

**Past Record**
- Is there a history of similar behavior?

**Demeanor**
- Do they seem to be lying or telling the truth?
Credibility & Cognitive Interviewing
Cognitive Interviewing and Credibility

- Deception requires greater cognitive load
- Deceptive individuals:
  - Prepare responses to anticipated questions
  - Develop a consistent, fixed narrative
- Honest individuals generally provide more detail or information
- Cognitive interviewing leverages differences in cognitive processing and strategy
  - Reveals inconsistencies in fixed narratives
  - Elicits verifiable details in credible accounts
- The motive for deception may also be of interest

Trauma and Credibility

- Investigators can only collect available relevant evidence
  - Never substitute trauma indicators for evidence
  - Trauma is neutral; it neither enhances nor detracts from proof
  - Lack of evidence from an individual often negatively impacts their credibility
Responses to Trauma

- Individuals may have different trauma manifestations, impacted by:
  - Personality
  - Availability or knowledge of coping strategies
  - Support systems or lack thereof
  - Capacity for resilience
  - Past history of trauma
  - Cultural differences

- Avoid biased thinking about what a person “should” or “would” have done, as this may invoke sexist tropes, rape myths, or other “victim-blaming” notions
Trauma and Credibility

- If an individual’s account changes, differentiate between more information, different information, and/or contradictory information
  - Minor or insignificant variations should not significantly impact credibility
- One’s affect is not evidence
  - May signal a need to probe more deeply or differently
Principles of Trauma Informed Practice

Investigators may help reduce the impacts of trauma by considering the following principles:

- Safety
  - The investigator spaces that feel physically and psychologically safe

- Trustworthiness & Transparency
  - The interview and overall process are transparent
  - The individuals running the process build and maintain trust with the parties and witnesses

- Empowerment & Choice
  - The investigator provides options and information enabling the party or witness to make their own decision
Triangulating Credibility & Consistency
Triangulating Credibility

- Abductive reasoning
  - Likeliest possible explanation based on incomplete facts
  - Less compelling than corroboration, but sufficient in some circumstances
- Investigator is faced with two different but equally plausible explanations
  - Need to determine which may be more likely, more logical
  - Use other evidence to drive the analysis
  - “In light of evidence provided by Witness C and Witness D, Respondent’s account appears more likely than Complainant’s account”
Triangulating Credibility

- Circumstantial analysis
  - More helpful when standard of proof is the preponderance of the evidence
  - A formal way to process inherent plausibility
- If A and D are true, is B or C more likely to be true?
  - C is a bigger stretch to get to than B, so B is more plausible
- Using known data points to extrapolate the likeliness of unknown facts
Consistency

- Consistent accounts may bolster believability
  - Parties or witnesses may be consistent but not truthful, which is why credibility is more about assessing believability than a way to find truth
  - In practice, inconsistency may be a better tool to assess credibility than consistency
- Carefully parse words or language to assess how (in)consistent a detail may be
  - Note when accounts are similar but not exact
- Consistency, like demeanor, is often a basis to probe more deeply
  - When someone gives inconsistent testimony, it presents an opportunity to clarify, recognize deviations, and explore what their basis may be
Credibility Assessments
Making Credibility Assessments

- Examine consistency of the story
  - Analyze statement substance and chronology
  - Inherent plausibility of all relevant evidence taken together
- Compare degrees of credibility within evidence
  - Is a piece of evidence consistent with other evidence known to be credible?
- Consider the amount of detail provided
- Non-verbal behaviors may be important to note
  - Do not let this drive the analysis
Common Credibility Errors

- Misplaced emphasis on:
  - Nonverbal indicators (nervousness, anxiety)
  - Inconsistent information
- Confusion about memory
  - Stress and emotion can complicate memory
- Parties’ status
- Investigator bias
Credibility Assessments

- If the Investigator does not make findings, the Investigator should use credibility assessments to direct the Decision-maker to examine more closely
  - Focus the Decision-maker on alignment or discrepancies that may be significant for their analysis
  - Summarize the evidence to provide a snapshot
  - Use citations to help Decision-makers find the evidence within the report
Decision-Making and Credibility

- The decision-making phase is the last chance for the Decision-maker and parties to probe credibility
  - Institutions may select from several options for the decision-making phase
  - Some courts have endorsed a hearing for credibility assessment purposes
- Common decision-making structures
  - Questioning through the Decision-maker
  - Questioning through parties’ Advisors when credibility is at issue
  - Questioning through exchange of written questions
Activity: Credibility Assessment
Credibility Assessment Activity

**Step 1**
- Read the fact pattern and statements from Omar and Devya
- Highlight elements that factor into credibility assessment

**Step 2**
- What information boosts Omar’s or Devya’s credibility?
- What evidence could potentially bolster or detract from Omar’s or Devya’s credibility?

**Step 3**
- Outline the evidence that impacts each Party’s credibility
- Itemize evidence you would like to collect related to credibility
Looking Ahead

- Day Two Activity
  - Opportunity to practice skills from today
    - From the initial investigation strategy through interviews and credibility assessments
  - Intentionally small and sparse case file
  - Mix of small group role-playing and large group discussion
    - Faculty modeling some skills
Investigation Simulation Exercise
Introduction

Participants will have an opportunity to practice skills from Day One:

- Investigation Strategy
- Rapport Building
- Cognitive Interviewing
- Funnel Technique
- Trauma-Informed Questioning
- Credibility Assessments
Activity

- Participants will review file documents in phases; do not read ahead
  - Each document will provide information or evidence
  - Each phase will have specific tasks
- Participants will engage in small group discussion and role playing to practice different skills
- **Note:** The file, by design, will only provide limited evidence
  - Participants should keep notes of any evidence that comes from small group or paired role-playing
  - Those notes will become part of the credibility exercise at the end
Phase 1

Materials for Review
- Formal Complaint
- RA Report
- NOIA Excerpt

Tasks to Complete
- Discuss the file as you would in a strategy meeting
- Outline the introductory spiel, given the information in the file
- Prepare initial questions for the Complainant, using cognitive interviewing strategies and techniques
- Discuss pre-interview rapport building strategies
Phase 1 Debrief
Phase 2

Materials to Review
- Materials from Phase 1
- Complainant interview transcript excerpts

Tasks to Complete
- Review the transcript excerpts
- Identify areas needing:
  - Further development through more questioning or evidence gathering
  - Different questioning structure
  - Improved trauma-informed questioning
- Keep notes of small group discussion
Phase 2 Debrief
Faculty Skill Modeling
Phase 3

Materials to Review
- Materials from Phases 1 and 2

Tasks to Complete
- Take turns acting as interviewer and interviewee
  - Use funnel method
- Keep notes of answers
- Interviewees can review Cognitive Interviewing Activity for ideas on how to vary their role playing
Phase 3 Debrief
Phase 4

Materials to Review
- Materials from Phases 1-3
- Respondent interview transcript excerpts

Tasks to Complete
- Review the transcript excerpts
- Identify areas needing:
  - Further development through more questioning or evidence gathering
  - Different questioning structure
  - Improved trauma-informed questioning
- Keep notes of small group discussion
Phase 4 Debrief
Phase 5

Materials to Review

- Materials from Phases 1-4
- Additional evidence file
- Any notes from role playing or other discussions

Tasks to Complete

- Assess Parties’ credibility using strategies outlined in Day One slides
- Draft key points for credibility analysis, as you would for the investigation report
Simulation Debrief
